# HOW TO SURVIVE THE COMING PROGRAMMABLE CURRENCY THREAT

## A Significant Economic Threat and a Solution

One of the truly great men of the 20<sup>th</sup> Century was Soviet dissident and human rights advocate Aleksandr Solzhenitsyn. He was at one point an avid Marxist but once criticized Joseph Stalin in a private letter (think about that for a minute) and was sentenced to prison. There he returned to his Christian upbringing and became one of the world's most famous writers, winning a Nobel Prize for literature. He authored the Gulag Archipelago that was instrumental in removing the blight of communism from his beloved Russian homeland. It did so by exposing the hypocrisy and lies of communism, showing it to be evil and anti-Justice.

In 1983, Aleksandr Solzhenitsyn received the Templeton Prize for Progress in Religion.

**Aleksandr Solzhenitsyn** warned us on June 30, 1975:

"I...call upon America to be more careful with its trust... Prevent those...who are attempting to establish even finer...legal shades of equality – because of their distorted outlook...short-sightedness and...self-interest – **from falsely using the struggle for peace and for social justice to lead you down a false road...** They are trying to weaken you; they are trying to disarm your strong and magnificent country in the face of this fearful threat – one that has never been seen before in the history of the world... I call upon you: ordinary working men of America...do not let yourselves become weak."

**America rose to the challenge in the 1980s and 90s but now we are facing the same threat again, only repackaged and technology enhanced.**

"If we don't know our own history, we will simply have to endure all the same mistakes, sacrifices, and absurdities all over again." –Alexander Solzhenitsyn

In this briefing Kevin Freeman reviews previous threat assessments and shares two new threats every American needs to understand now!

**Your Mission:** To be aware of the potential of despotism through new technologies for convenience and entertainment. You could be enslaving yourself without realizing it.

**Important:** There is a new technology threat that is going to be bigger than the pandemic. Be sure to capture the digital currency solution at the end of this briefing!

Ep. 4-146 (OSINT) Open-Sourced Intelligence Special Report. This Threat Briefing is part of an exclusive teaching series with Kevin Freeman in the Economic War Room®. Kevin Freeman is considered one of the world's leading experts on the issues of Economic Warfare and Financial Terrorism. He has consulted for and briefed members of both the U.S. House and Senate, present and past CIA, DIA, FBI, SEC, Homeland Security, the Justice Department, as well as local and state law enforcement. His research has been presented in critical DoD studies on Economic Warfare, Iran, and Weapons of Mass Destruction presented to the Secretary of Defense and the Under Secretary of Defense, Intelligence. He has traveled extensively with research trips to Russia and China and throughout Europe and the Americas. He is also a Senior Fellow at the Center for Security Policy and a Contributing Editor to The Counter Terrorist magazine.

### It's 2021 – This is a New Warning to America with a Similar Theme:

- » Solzhenitsyn warned the people of America not to enslave themselves.
- » He warned that there would be agitators among us seeking to bring despotism but disguising it as freedom and equality.

**In America...we have a Constitution that guarantees our liberties. But that does not mean that unscrupulous radicals won't be able to sway the people or tempt them into enslaving themselves.**

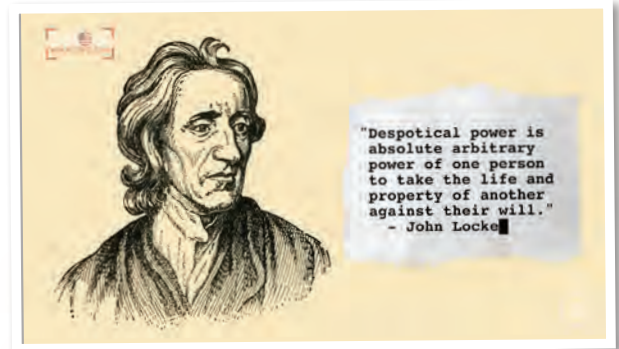

**CAUTION:** We see a propaganda war and we also see the adoption of technology for convenience and entertainment. Both are converging to create the very despotism that Solzhenitsyn warned us about.

**Lesson in History:**

**John Locke's *Second Treatise*** defines  
Despotical power:

**"Despotical power is absolute, arbitrary power of one person to take the life and property of another against their will."**

John Locke wrote that a century BEFORE the American Revolution.

It is still true today but he couldn't imagine all the technological innovation created that makes despotism easier than ever before.

**Important: The Economic War Room sees a new threat emerging rapidly.**

- » Most people don't get it, but this is as insidious as we've ever seen.
- » It is undoubtedly early. But will come like a thief in the night if unprepared.

We are not sure how early we are on this threat, but believe the potential harm is worth addressing now and there are potential solutions if we act soon!

**1. Before we address today's new threats, let's review highlights of Economic War Room's previous briefings and track record.**

**⚠ THE COVID THREAT ALERT:**

We were early on COVID.... 60 cases in US and only two deaths when we warned in Episode 76. It was mainly a China pandemic at the time.

Our warnings were prescient, and specifically warned about:

- » Lockdowns and Masks.
- » That most people would survive, especially young people.
- » That this is a political football.
- » The result would be a massive increase in debt (reported Federal debt of \$30 trillion in blink of eye).

- » We informed about the Wuhan lab theory.
- » We also covered market, economic, health, and political impacts.
- » Supply chain disruptions were listed, and we told Economic War Room patriots to “stock up” on key items ahead of shortages.
- » We also warned the media would use it to create panic porn to win the election
- » Read the Economic Battle Plan™. EWR’s viewers were given about two weeks preparation time before everything started shutting down.

[DOWNLOAD Economic Battle Plan™ Episode 76](#)

These were confusing times, but Economic War Room Patriots had clear warnings.

**! THE ENERGY THREAT ALERT:**

**We predicted the Energy threat providing 10 months of lead time.**

- » Remember? Oil traded at negative prices little more than a year ago.
- » We had Troy Andrews on Episode 85, airing April 30th of last year.
- » Later we warned about Biden policies (fracking/pipelines) that would lead to high oil prices and inflation and loss of American energy independence.
- » We provided 10 months of notice to prepare for a drastic move in energy prices.

[DOWNLOAD Economic Battle Plan™ Episode 85](#)

**! ELECTION HACKING THREAT ALERT:**

We’ve also covered the risks of election hacking, starting over two years ago.

- » All the debate over voting machines should have been settled long ago. Just look at Episodes 20, 21, 70. All came out more than a year before November 2020 elections.

- » These Economic Battle Plans™ include bipartisan, fact-based evidence.

[DOWNLOAD Economic Battle Plan™ Episode 20](#)

[DOWNLOAD Economic Battle Plan™ Episode 21](#)

[DOWNLOAD Economic Battle Plan™ Episode 70](#)

### **INFLATION THREAT ALERT:**

We also warned in advance about Inflation and how things have changed with a new Biden Administration.

- » We predicted there could suddenly be gas lines again and Jimmy Carter inflation.
- » Not unexpected. But we warned in back-to-back episodes 124 and 125 (aired February 4 and 11 this year) ...just after the inauguration.
- » It took just over a month before everything became obvious.
- » From March 16 to May 7, lumber prices nearly doubled.
- » Inflation was not considered a problem till about March 16. Then it became a huge problem that no one can ignore.

[DOWNLOAD Economic Battle Plan™ Episode 124](#)

[DOWNLOAD Economic Battle Plan™ Episode 125](#)

### **CANCEL CULTURE AND THE WAR ON FREE SPEECH - THREAT ALERT**

- » And before cancel culture became a huge thing, we aired Episode 19 in January 2019, the War on Free Speech.
- » We warned if you violate the orthodoxy, you get cut off.

For example, we talked about a prominent Spanish politician that shared on Twitter that: "Men can't bear children."

He was cancelled from Twitter.

It is Orwellian. It is the control of language and what we are allowed to say.

[DOWNLOAD Economic Battle Plan™ Episode 19](#)

**⚠ CHINA SPYING – THREAT ALERT**

We reported on China spying across the US with University professor indictments.

- » Every week, it seems like a new indictment. Harvard professors in chemistry. Many are Americans, some are Chinese nationals. But their clear focus is IP theft.
- » China is now taking over internet control. We warned about infiltration in the international bodies. Now we know that’s true from leaked documents.

**⚠ ESG INVESTMENT - YOUR MONEY BEING USED AGAINST YOU – THREAT ALERT**

We have reported on Weaponized Money and ESG Investments and what is really happening with some of your investments.

- » ESG and weaponized investments.
  - ESG is where your investments monitored to see if they are socially responsible.
  - This is not what Americans want according to EWR polling. They want investments that support their country and their family.
  - ESG investments are designed to prioritize a political agenda over your results.
  - It is hypocritical. Punish American investments but no restrictions on China.

**IMPORTANT:** IF YOU HAVE NOT SIGNED UP FOR OUR FREE WEEKLY ECONOMIC BATTLE PLANS™

**Sign up here now.** <https://www.economicwarroom.com/battleplans>

The Economic War Room® was designed to be your War Room and keep you informed. The government and military have their war rooms. It is time for main street America to have their Economic War Room where they can be ahead of key threats with shared insights.

**All these threats impact your money, your livelihood, and your way of life!**

**CAUTION: All the above threats may pale in comparison to what could be in the near future.**

## **A TECHNOLOGY DRIVEN THREAT THAT COULD BE WORSE THAN THE PANDEMIC!**

It may seem benign, and many may view this new technology as a positive. The threat to your liberty may be worse than the pandemic or even election fraud.

- » The good news is that there is still time to address!
- » Understand that the threat to our Liberties is serious and it is about to ramp up now.

---

“Think of it this way. Remember the movie *Independence Day* with Will Smith? All the people cheering on the aliens who appeared over major cities. They were smiling, waving.... till the ray of death came down and killed them all.” -Kevin Freeman

## **2. ACTION WARNING: Embrace technology but with caution to protect liberties.**

### **Look at Social Media for a glimpse of what is ahead:**

- » At first it was a convenience. A way to keep in touch. But you become the product.
- » Next, they weaponize your communications.
- » Then they cut you off.
- » They take your data to manipulate you.
- » Businesses were sucked in and then de-platformed, resulting in the loss of all that advertising investment and customer acquisition overnight.

**It is all done with shifting rules and hidden terms of service.** Now there are new areas where it will be all that and much worse!

3. Economic War Room has identified two NEW threats to watch out and prepare for:

- A. All information on your computer could be deleted for what some corporate bureaucrat considers harmful or hateful content.
- B. Programmable money – It will be used and spent how you are told or your money may just disappear.

**ALERT THREAT:** Is information on your computer are safe? The threat may not come from hackers, but from Microsoft.

Now it appears Computer Software companies may want to be like the social media companies.

Think about the data on your computer. It is not just cyber threats you need to protect from, Microsoft's Terms of Service make it clear they think they have permission to read your data and determine if is OK for you to use their software based on content.

- » Read the Microsoft Terms of Service sometime for Office 365. Here is a simple quote that's right up front: <https://www.microsoft.com/en-us/servicesagreement>

*"To the extent necessary to provide the Services to you and others, to protect you and the Services, and to improve Microsoft products and services, you grant to Microsoft a worldwide and royalty-free intellectual property license to use Your Content, for example, to make copies of, retain, transmit, reformat, display, and distribute via communication tools your content on the services."*

*"Don't engage in activity that is harmful to you, the Services or others (e.g., transmitting viruses, stalking, posting terrorist or violent extremist content, communicating **hate speech**, or advocating violence against others)." (section vii)*

- » Look for what they might deem as "hate speech?"
  - For example: What if you type the words, "men can't bear children?"
  - Creepy enough that they can look at your information and copy everything.
  - Imagine, all your Word documents or emails made to disappear.

It's all right there in black and white. Very broad terms like: "threatens harm," or "misleading."

Who determines that criteria?

Your life is on your computer, but now it appears Microsoft wants to have the power to take that away.

**ALERT THREAT:** Are you ready to be de-banked? It is already happening to some people and businesses now.

Your Money is being threatened, even many banks think they should have all power over your money.

**You have already heard you can be de-banked.**

- » Chase just closed a business account of Dinesh D'Souza without any real warning or explanation.
- » Dinesh made films such as "Obama's America," and "Hillary's America" that were critical of leading Democrats.
- » He went to prison for a campaign finance violation that typically earns slap on the wrist.
- » It has also been done before to gun companies. PayPal and others have closed accounts of those who express opinions contrary to new orthodoxy.
- » But at least for now they allow you to take your money out!

**One of the attractions of Bitcoin and other crypto is anonymity and place to put your money. But there are some problems and vulnerabilities:**

- » There is the potential to tax a "capital gain or loss" every time it is used as money.
- » Governments are wary of digital currencies.
- » A Communist Chinese crackdown dropped bitcoin prices in half.
- » Some believe the main reason for any crackdown is to stop competition to the government's control over money.

Unfortunately, it gets worse!!

**4. China is developing Crypto Yuan and the Federal Reserve is pushing for a digitized currency as well.**

On the surface digital currency is convenient, modern, and sophisticated.

- » At the same time, we have seen how the Ant Group/Alibaba is an attempt to use America's capital against us.
  - » We discussed this in Episode 107 in detail. While Ant Group was paused, the threat remains. [DOWNLOAD ECONOMIC BATTLE PLAN™ 107](#)
  - » China is using the Belt and Road initiative as a goal to displace the US dollar?
  - » In addition, China also wants tracking capability, data capture, and control from a digital currency. Let's look at what this really means.
- What if you have the government-sanctioned currency but they only allow you to use it certain ways? Or in certain locations? Or there is a new lockdown. Only this time, they limit the geography where your money can be spent.
- This currency will be completely tagged and may have conditions.
- The currency might be good to only buy only foods deemed healthy.
  - Exaggerating? Remember Bloomberg's soda-size restriction in New York? This proves they want control.
  - Or you might be able to buy an electric car but not a gasoline-powered car?
  - Or you can buy from an approved retailer but the money doesn't work elsewhere at other retailers?
  - There may be an expiration date on your money to force spending? Or the government could freeze currency that cannot be used until a certain date?
  - It could be a tax you at will scenario. Just make certain money disappear. Or move it to another account.

Remember the Golden rule: He who has gold makes rules? Not in this case! He who controls currency makes the rules. The war on cash is accelerating.

“Beijing has tested expiration dates to encourage users to spend it quickly for times when the economy needs a jump start. This sounds like a government’s dream and a citizen’s nightmare. Bureaucrats have long wanted control like this. They can fine-tune the economy, reward ‘good’ behavior, punish ‘bad,’ tax at will, create money at will, replace currency and wipe out the black market. Remember gold confiscation in this country in the 1930’s? They said you can’t own gold. This is the mark of the beast-type stuff where you can’t buy or sell without the government’s permission.” –Kevin Freeman

## 5. Programmable Money – It’s in China now and may be coming to the US sooner than you think.

From the American Institute for Economic Research – April 24<sup>th</sup>, 2021

“Earlier this year, China began to roll out a project that had long been in the works—a digital version of its currency, the yuan, is now [being used](#) in four Chinese cities. The Chinese government sees two major potential benefits to the experiment: a tangible challenge to the U.S. dollar’s global ubiquity, and a way to control how Chinese citizens spend their money.”

As a government-issued currency, the digital yuan can be manipulated and monitored in a number of ways. Importantly, **it is programmable**. [Writes The Wall Street Journal](#), “Beijing has tested expiration dates to encourage users to spend it quickly, for times when the economy needs a jump start.”

### WATCH OUT:

## China Creates Its Own Digital Currency, a First for Major Economy.

<https://www.wsj.com/articles/china-creates-its-own-digital-currency-a-first-for-major-economy-11617634118>

This sounds like a government’s dream and a citizen’s nightmare! Bureaucrats long wished for control like this. They can fine tune the economy telling you where to spend your money.

- » Reward “good” behavior and punish “bad.”
- » Tax at will. Create money at will.
- » Replace currency and wipe out black market.
- » Remember gold confiscation? This country. 1930s.
- » **Mark of the Beast**...can’t buy or sell without government’s permission.

**Also, we have this from an article, *Weaponizable Money* by Peter Earle:**

*“A state determining that its populace is insufficiently supportive of a military campaign may decide that hardships are not being [sufficiently shared](#): A sudden, unannounced attack on bank balances resulting in an immediate loss of purchasing power could be imposed to align interests. Could a failure to consume certain goods—say, domestic versus foreign—trigger a government-decreed, disciplinary lopping of an offender’s bank balances? In the same way that a former president allegedly used the Internal Revenue Service to [terrorize and harass](#) political opponents, a currently innocuous programmable digital currency may, over time, morph into nothing less than weaponizable money.”*

**Think About This: A state can REWARD or PUNISH more than behavior.**

It can be “Wrongthink” and “Rightthink.” It is even more than being de-platformed, they can look at your social media posts or even your email.

- » **Shut down your money** - Remember Solzhenitsyn was sent to the gulag for things he wrote in a private letter. This is an even easier form of control. There is no expense of incarceration here. They can just shut down your money.
- » **ID’s for spending your money** - And for tracking. They can require an ID to buy or sell that matches with whoever owns the \$. Of course, we cannot require IDs for voting...that would be racist :).

**Think this is for China only? A digital dollar is in consideration for the US now:**

Unfortunately, this endeavor may not be an isolated experiment for much longer. Again from the article:

*“Already U.S. Federal Reserve is engaging in research to build and test a digital dollar. Central bankers the world over, in fact, are signaling increasing openness to experimental policy initiatives. This particular project is still in its infancy, but one thing*

*is certain regardless of differing cultures or political systems: Central banks of all colors are prone to the pitfalls of central planning and will necessarily inflict unintended consequences upon the populations they serve."*

Venmo blocked certain payments to the Gaza strip marked for Palestinian relief. How much more would a government interfere? They can block anything you want to spend or do, but there's hope this does not have to be inevitable.

**WARNING: Programmable currency will not serve liberty-minded citizens. It really benefits the programmers and those who want to control YOU!**

## 6. THE SOLUTIONS - Before it is too late, you need to act on now!

**Weaponize Your Money** toward Liberty Security and Values with an NSIC advisor!

We must be alert and work together! It is time to weaponize our money BEFORE they turn it against us.

"Many of you may be saying that you won't accept digital money. I doubt that because it will start with a FREE government handout like the next round of stimulus. You might get your tax refund that way, so you'll be quick to open an account." -Kevin Freeman

**Now, let's look at how we combat this?**

» **The first step is to join our movement!**

Get a financial advisor and start to weaponize your money for liberty, not oppression.

If you already have a financial advisor, talk with them and nominate them for the NSIC certificate training at [www.economicwarroom.com/advisor](http://www.economicwarroom.com/advisor).

"I've spoken with members of Congress and senators, and they always ask me, how many people do you represent and how much money? You know, it shouldn't matter if one person in a single dollar has the right solution and the truth they should listen to. Individual liberty should matter. But that's not the case today." –Kevin Freeman

"We must all hang together.  
Or we may hang separately."

–Benjamin Franklin

**ALERT:** You are going to need a financial advisor for what's coming. It will get complex and challenging. A good financial advisor can help you weaponize your money before it's weaponized against you.

There are three things you can do with money:

**Invest It – Spend It – Give It**

Studies show that investors want like-minded advisers. There are at minimum 74 million Trump voters plus many Biden voters who do not want a dystopian future. That's a lot of money represented there. Working together, we will make an impact to protect America's national security and investment infrastructure.

**Remember. If it is just you fighting this battle, you've already lost.**

That's why we started the NSIC Institute. Our goal is to train 10,000 financial advisors with \$1 trillion dollars of capital in the next five years. That will be millions of investors who vote. They'll pay attention. We train financial advisors to help people protect themselves. You shouldn't be financially supporting those who are seeking to harm you or destroy your liberty.

**ATTENTION: Already, companies have combined with a slim leftist majority in the Congress and they're wreaking havoc right now.**

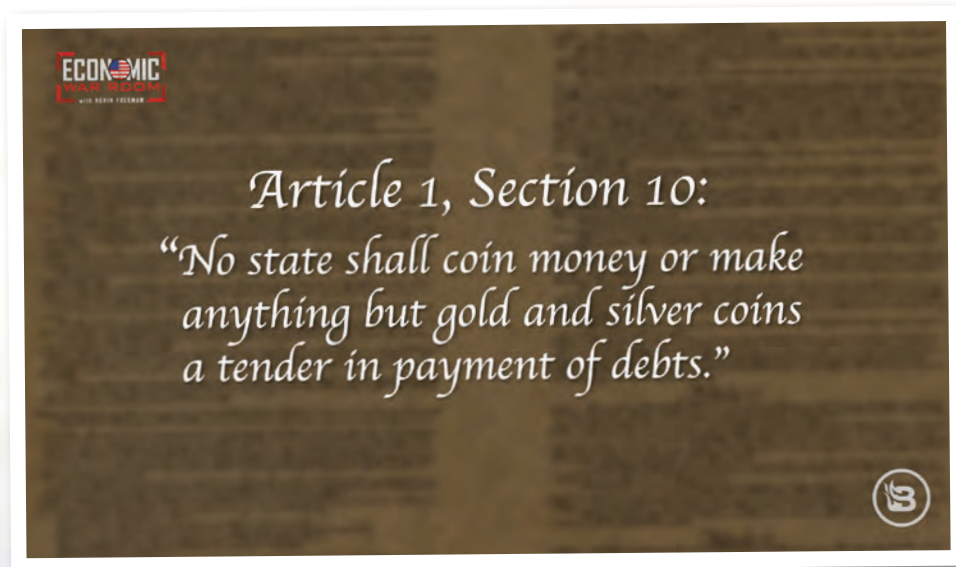

**"Imagine if they could take control of your money and everybody else's.  
You heard the Capital One advertising question, 'what's in your wallet?'"**

**What should be in your wallet are investments in things that defend rather than destroy liberty. We need 10,000 advisors. That's why we're launching the Economic War Room training at Liberty University." –Kevin Freeman**

**7. We are exploring an idea in the Economic War Room that may ELIMINATE THE DIGITAL CURRENCY RISK AND ADDRESS INFLATION.**

**It's A Big Idea! Imagine a currency that has inflation protection. It's backed by a government but also by gold.**

- » And no, it is not the Chinese Digital Yuan, although that is what they are contemplating (gold backed). The problem with the Digital Yuan is that the Chinese Communist Party will control it and part of their purpose is to destroy American economic power.
- » What if this government was pro-America? What if the Constitution allowed for this new currency?

**8. Two states, Utah and Texas, have specifically studied Article One, Section 10 and have taken initial steps to address this. Kevin Freeman has worked with both.**

A. Utah was among the first to grasp the opportunity of state currency.

From this we've started something. Kevin Freeman worked with the state of Utah and helped the Fiscal Risk Commission and supported Ken Ivory, a state representative. The legislature passed the 2011 Utah Legal Tender Act.

**Utah signed a bill to bring back constitutional money! They now have silver coins that are legal tender in the state of Utah.**

**B. The Texas Bullion Depository - Texas is positioned for the next step in this concept of legal tender:**

Texas created the Texas Bullion Depository. It was started by Texas State Representative, Giovanni Capriglione, someone who read Kevin Freeman's book Secret Weapon. Gio was Kevin's state rep and visited with Kevin when he first ran. His bullion depository is groundbreaking.

What if you could take your gold and silver and deposit in Texas or give Texas cash in US dollar form to buy and hold gold and silver?

**Here's how the plan works:**

- You deposit your gold/silver in the Texas Bullion Depository.
- Texas would create digital coins (like bitcoin) tied to deposits.
- There would be no privacy violations...it keeps track only of the amounts.
- You can spend it like you would with a debit card.

**That solves most of the problems. This would be good money!**

ATTENTION: We need to work toward one more thing:

The IRS needs to issue a letter that the Federal government will not tax capital gains or losses as they do with actual gold and silver (and even bitcoin).

**To accomplish this, Texas might have to sue but the belief is that the Supreme Court would accept the clear language of the Constitution. There should be no way they could tax money as defined by the Constitution.**

- These would be Constitutional dollars!
- Other states could follow suit or just adopt the Texas approach.
- This is literally more constitutional than the Federal Reserve notes we currently

- use (and those aren't taxed for gains and losses in purchasing power)!
- With this type of system, Money would flood in from around the world.
  - The other benefit is the digital currency backed by gold is infinitely divisible.
  - It would be more trusted than a digital yuan even if that were gold backed. [Painted gold bars have been discovered in a vault in China...can you really trust Communist China?]
  - It would also set a standard that the Federal Reserve would have to beat.

---

"Every time you do a Bitcoin transaction, you have a gain or loss and you have to pay tax on it and keep track of it. But if it's Texas issued money, according to the Constitution of the United States, there is no way they should be able to tax it. And we either need the IRS to admit it or we need to take it to the Supreme Court and force them to admit it. This would be constitutional money and other states, I guarantee you, would follow suit or they would just adopt the Texas approach. This is more constitutional than Federal Reserve notes. Money would flood in from around the world. They would trust Texas. They would trust gold. They would trust the technology. It's infinitely divisible because you could have a fraction of an ounce of gold represented and it would be more trusted than a digital yuan." –Kevin Freeman

---

## 9. A look at the function of money and how this idea aligns with federal reserve standards.

Constitutional money backed by gold meets the Federal Reserve standards.

According to the Federal Reserve (<https://www.stlouisfed.org/education/economic-lowdown-podcast-series/episode-9-functions-of-money>) money has three functions:

- » It's a store of **value**.
- » It's a unit of **account**.
- » It's a medium of **exchange**.

In the Economic War Room, we believe there should be a fourth attribute: **Stability** [Bitcoin from pennies to \$60,000 in a decade and then fell to \$30,000 in a few weeks does not represent stability.] Gold backed state tender would be stable and offer protection against inflation.

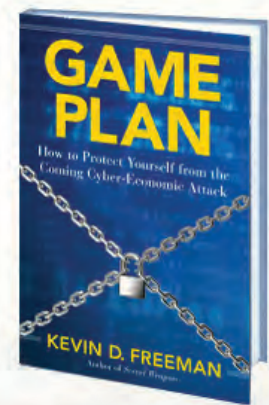

## 10. Action steps to keep this moving.

- » What we need is for Texas to adopt the plan in full and then to push the IRS for a ruling or begin a lawsuit.
- » Clearly, the founders wanted states to have stable currencies. This obviously meets the definition.
- » Everything else is now either in place or available so we should make this a priority.
- » The Texas bullion depository already has been created.
- » Blockchain and other cryptocurrency technology exists and can be adopted.
- » The Constitution provides for states to issue gold and silver coins as legal tender.
- » People are clearly ready for a new monetary system that they can trust as an alternative to the US dollar.
- » There will be political opposition. Lots of people make lots of money from the current system.
- » But the will for change is strong also.

**NOTE:** Economic War Room and Kevin Freeman recognize this may not be the right or the only solution but it is one clearly worth exploring and deserves rallying support as soon as possible.

**Get Kevin Freeman's book *Game Plan, How to Protect Yourself from the Coming Cyber-Economic Attack*.**

You can read more about this idea in Kevin Freeman's book, *Game Plan* published in 2014. Details are on page 223. ([CLICK HERE TO GET THE BOOK](#))

## 11. IMPORTANT: The time to launch this is now, but we need a political movement that goes back to the question, "how much money and how many people do you represent?" The answer is that we have a large and growing audience that is working together.

"To maximize the impact, we need you, along with everyone you know, to weaponize your money. And we need trained financial advisors. Ten thousand advisors trained represents a trillion dollars in capital, and that's just the beginning. Now, not all advisors will agree, but do you want an advisor who doesn't agree with you? We're going to band together at the NSIC Institute - National Security Investment Consultant Institute.

If your advisor is not willing to support you in this, find a new advisor. I promise there are lots of advisors who are looking for new clients. And if you're an advisor, this may be your niche. There are lots of clients looking for a like-minded advisor to help them. Programmable money is a threat. We have the answer!" -Kevin Freeman

## Why You Should Care:

- › Programmable Money may be the biggest threat yet to your Liberty.
- › There is a potential real currency solution if we work together now!
- › This will not work unless we mobilize our efforts.
- › Our Economic Battle Plan™ and Threat Assessments have been consistently accurate giving Economic Patriots an advance look at what is coming.
- › We built the Economic War Room to be your War Room and source for reliable information so you can make informed decisions with your financial advisor and weaponize your money toward liberty, security, and values.
- › We are in an economic war. This is a battle for your money, but more important it is a battle for your liberty.
- › You have money that can be weaponized toward your values in how it is invested, spent, and given.
- › With the Chinese government developing methods to take control of American society, it is important to understand that this battle is real. Now is the time to do all you can do to avoid aiding the Communist Chinese Party.

---

"Maybe the most important thing you can learn from this entire Economic War Room is that you must have a financial advisor standing at your side that understands the threats and opportunities and is willing to do the hard work with you to weaponize your money." -Kevin Freeman

---

## Action Steps:

1. We need Texas to adopt the Texas currency plan in full and then to push the IRS for a ruling or begin a lawsuit. **If you are a resident of Texas, forward this Economic Battle Plan™ to your state legislator.**
2. If you live in another state, forward this Economic Battle Plan™ and work with your legislators on a programmable money solution that may be like what Utah and Texas is doing or develop something better.
3. Recognize there will be political opposition. There are a lot of people making big dollars from the current system. The key is to work together through the NSIC advisor network that is developing now.
4. It is critical you and your financial advisor become part of the movement focused on alternatives to China's digital currency. Develop your financial game plan now and work with other Economic Patriots organizing around the NSIC. Get Kevin Freeman's book, *Game Plan* - [CLICK HERE TO GET A COPY.](#)
5. Weaponize Your Money in your investing, spending, and giving aligned with LSV. (Liberty, Security, and Values)
6. Read Microsoft's new Terms of Use and see if you are comfortable with it. Alternative solutions may need to be developed or we must propose new legislation that encourages free speech and privacy rights. Share this with your state and federal representatives.
7. Invest in LSV and not ESG.
8. **Nominate your financial advisor at [EconomicWarRoom.com/advisor](http://EconomicWarRoom.com/advisor)** and let them know you think this would be a great opportunity for them. Classes are expected to launch soon, and our list is growing fast.
9. **Our briefings have been accurate and beneficial for Economic Patriots and their financial advisors. If you have not already done so,** Be sure to sign up for our free Economic Battle Plans™ at [www.EconomicWarRoom.com](http://www.EconomicWarRoom.com)
  - o If you are following Economic War Room you will be on the leading edge related to global threats, geopolitical analysis, and how you can weaponize your money to strengthen America. Your money, livelihood, and way of life are at risk and these tools are designed to mobilize America to protect their economic liberty.

# ECONOMIC BATTLE PLAN™

WEAPONIZING DIGITAL CURRENCY **4.145**

CLEARED FOR RELEASE 07/08/2021 (ECONOMIC BATTLE PLAN™ POINTS: 97)

In the **Economic War Room®**, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve America’s problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The small ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.]

**We need more Economic Patriots on the team!** Consider what you can do now to help strengthen America or even help someone in need. Keep in touch with your congressional representatives. Choose from the list or set your own goals:

- ✓ At our [Economic War Room®](#) website, sign up to TheBlaze for our complete weekly shows. Please use our code (**ECON**) from that link for a discount and FREE trial.
- ✓ Follow, like, comment, and share on [FB](#) and [Twitter](#). Look for short video segments on [FB](#) and [Rumble](#) and make sure. We recognize these tools may be compromised at times, but if they are not filtered, they are the major platforms available to reach out to the public. [Know that alternatives to the social platforms listed above are under EWR consideration.]
- ✓ Check out XOTV (<https://xotv.me/channels/233-economic-war-room>), a new free speech video platform that Economic War Room is proud to partner with. Access is FREE but consider making a donation to EWR on that website to help with Economic War Room’s research and production costs.
- ✓ You are welcome to share this battle plan and our short video segments with friends on [FB](#) or [YouTube](#). We set up the Economic War Room® to be your resource for information, preparation, and mobilization.
- ✓ Do this now! Have a financial action plan based on multiple geopolitical scenarios developed now. Advanced preparation is key. Trying to figure what to do when an economic event happens is usually too late.

### Shareable Quote:

**“You’ve got money. It’s a tool to preserve, protect and defend the culture, to enrich your life, to take care of your family. But you’ve got to weaponize this tool.”**

– Kevin Freeman, CFA
