

Space: The Existential Threat Democrats in Congress Are Ignoring

Recently, multiple democrats in Congress have called for abolishing the Space Force. Some naively believe that space should be a shared global initiative designed only for peace. At the same time our adversaries are playing a completely different game.

Whoever controls space will control the planet! Unfortunately, Congress and our own FAA bureaucracies are preventing the US from taking a leadership role in the evolving space race.

For your briefing this week, Lt. General Steven Kwast (Ret.) shares how space is essential for our protection, prosperity, and values.

There is significant potential ahead but also risk if the US Space Force is not serving as the 'guardians of the galaxy.'

Your Mission: To understand the strategic importance of the US Space Force and to be alert as it relates to new innovations and growth industries from space.

Ep. 5-160 (OSINT) Open-Sourced Intelligence Briefing. This includes quotes and summaries from Kevin Freeman and Lt. General Steven Kwast (Ret).

General Steven Kwast recently retired, and last served as commander of Air Education and Training Command, Joint Base San Antonio-Randolph, Texas. General Kwast is currently Chief Global Office and President of Genesis Global.

He has a background in aeronautical engineering, history, strategy, technology, culture, and economics. He was raised in a remote African tribe and is a graduate of the United States Air Force Academy in aeronautical engineering. He holds a master's degree in public policy from Harvard's Kennedy School of Government. He has extensive experience in recruiting, education, training and developing the work force for the US Air Force. He was the University President for the Air Force's University (Air University) in Montgomery Alabama. He is a combat seasoned fighter pilot with extensive command experience at every level in the US Air Force. He authored the "Fast Space" study that puts forward a plan to develop the economic and national security power of Space for 21st century challenges.

1. **What some Democrats in Congress do not know as they seek to abolish Space Force.**
It is essential for our protection, prosperity and values.

What these Democrat in Congress are missing, has happened before throughout warfare history with a bias to specific military tactics.

It's been argued before, should we have a navy or standing army? Now it is Space Force.

"It happens at every juncture in history, even the Founding Fathers and in the Federalist Papers, there was an argument whether we should even have a navy or a standing army.

And so, I have no fear that this effort will fail. But there will always be a component of society that does not understand human nature or history and will want to have no army, no navy, no ability to secure our economy, our government, or our sovereign soil.

I would suggest to you that many times its lobby groups and people with money who have an agenda that animate these small sectors of Congress to try to kill something that is essential for our prosperity, our protection, and for our values."

—Lt. General Steven Kwast

Lessons in History: Blind politics over strategy – China in the 1400s

"There is nothing new under the sun." –King Solomon

Kwast shares about China's century of humiliation.

The Chinese had a political party that came into power that built a Navy with global shipbuilding and commerce.

- In the 1400s, China owned the greatest seagoing fleet in the world with 3,500 ships.
- By 1525, with a new political party, China's "Treasure Fleet" was destroyed.

There was such hatred of the former party, they burnt all the ships to the ground.

That began their 600-year economic decay that ended in the century of humiliation, and China has never forgotten that.

This is why China doesn't want our Space Force. They want to be the only players in space to dominate the economy of the 21st century.

There are parallels to this today. Political or even adversary groups are lobbying against the US Space Force for their own benefit.

- » There are a lot of "Never Trump" politicians that want to push the opposite direction of whatever the Trump administration did.
- » We need to be concerned that some of our adversaries, like China, would benefit if we did not have a Space Force.
- » **Note: China has a massive lobby in Washington. (Their goal is not to represent you.)**

"China wants to dominate space and they are concerned about the unknown factor of Innovation that could come from a US Space Force." -Lt. General Steven Kwast

China is afraid of the US Space Force. Kwast highlights the following points:

- » China is afraid of it culturally because China likes to solve for X. They prefer certainty.
- » The Space Force is a great variable for them because they plan on dominating the global economy through the geography of space, just like the open oceans dominated the geography and the economy for England and Spain several hundred years ago.
- » **China is doing everything they can to kill a good idea because they are afraid of it and they're afraid of the innovation that could come from the Space Force.**

Kevin Freeman also shared about his meeting with a former Space Force officer regarding Critical Race Theory (CRT) and Marxist ideologies now being emphasized within our military.

Our Military is being politicized and now has Marxist teaching within.

Lt Col. Matthew Lohmeier (RET) of the Space Force recently had push-back from the military for addressing Marxist ideologies that are becoming prevalent in the United States military.

From Military.com: <https://www.military.com/daily-news/2021/05/20/space-force-co-fired-over-comments-about-marxism-military-now-subject-of-ig-probe.html>

"I have written a book about a particular political ideology (Marxism) in the hope that our Defense Department might return to being politically non-partisan in the future as it has honorably done throughout history," stated Lt Col. Matthew Lohmeier.

ALERT: On 10/5/21-The DOD is now monitoring continual posts of military on social media. (They seem more concerned about wokeness than military readiness.)

Economic War Room will cover more on this in future briefing and episode.

2. How these anti-Space Force democrats in Congress could cause a catastrophic event in space and the USA.

From The Gazette Sep 22, 2021, Updated Sep 29, 2021

https://gazette.com/premium/space-force-abolished-house-bill-would-do-just-that/article_7589e9f6-1bd5-11ec-9112-0f98af62e60b.html

A group of House Democrats introduced a bill to abolish the nation's newest armed service, eliminating the Space Force.

The bill to kill Space Force is co-sponsored by U.S. Reps. Maxine Waters, D-Calif.; Rashida Tlaib, D-Mich.; Marc Pocan, D-Wisc.; and Chuy Garcia, D-Ill.

A group of House Democrats introduced a bill Wednesday to abolish the nation's newest armed service, eliminating the Space Force and giving the Air Force its responsibilities.

Backed by five members of the House Progressive Caucus, which is composed of Democrats on the party's left wing, the "No Militarization of Space Act" was introduced as congress debates its annual Pentagon policy bill.

"It's time we turn our attention back to where it belongs: addressing urgent domestic and international priorities like battling COVID-19, climate change and growing economic inequality," said the measure's author, U.S. Rep. Jared Huffman, a Democrat from the wealthy San Rafael suburb of California's Bay Area. "Our mission must be to support the American people, not spend billions on the militarization of space."

Other sources state these congressional representatives believe space is a global initiative used for peace.

General Kwast explains what these democrat lawmakers do not understand:

As China seeks to dominate the economy in the 21st century, the US must be there to preserve the peace.

"We need a Space Force for the same reason that Hamilton outlined in Federalist Papers, 23 through 29. If we as a country want to hold on to our values and our economy, we must be able to preserve the peace in case somebody on this planet decides to come after us.

- › Space is more powerful than even the open oceans.
- › Space, it's right above your head. If you look up right now and you see those clouds just a few short miles above those clouds is the boundary of space and that is where China is operating.
- › They will be able to touch us and affect our economy and our security.

The Space Force is called guardians for a reason. They are here to guard the peace, to keep the peace and to provide for the common defense. And if they are not there, China will have their way with us because they will be only a few miles over every one of our heads and they can do anything they want from that distance in the electromagnetic age." –Lt. General Steven Kwast

Both Russia and China are working toward strategic positions and domination in space.

- » China is the biggest threat and more powerful because of their economic throwaway.
- » China has more economic throwaways than America right now, even though we're the number one economy because of their dictator who can funnel all power and money to one vision.
- » That vision for China, if people aren't tracking, is the domination of space for the economic power of China that will translate into military and political power.

3. The National Security Threats in Space and China's New Existential Threat.

WARNING: America needs to be prepared now as there will be no time to react later.

Our information, energy grid, economics, and transportation can be obliterated from space.

"Imagine if Hitler came to power and America did not have a Navy, did not have an Air Force, and did not have an Army. How would history have changed? How would the security of our economy, our prosperity, our values of freedom, liberty, and democracy have been defended?" -Lt. General Steven Kwast

IMPORTANT: General Kwast makes these key points about peace through strength:

- » This is essentially what the founding fathers talked about as the need for the common defense and for the peacekeeping forces, the forces that keep the peace.
- » If you study human nature and you study history, the great power competition since the beginning of recorded history, there is one lesson that jumps out at you that is undeniable and that is this:

If you want peace, then you need to have the strength to hold firm to your values. If you don't have that capability to defend your values, you will lose them to somebody else who is willing to use that power.

At the beginning of World War II, America had slashed our navy and we slashed our armed forces and we saw the rise of Hitler.

In space and with the attribute of speed and range, we will not have the luxury of time if we are engaged by an enemy.

- » One of the reasons why Space Force is so uniquely different than World War II is that in WW II we had a number of years to gin up our economic industrial base to produce the kind of capability to paralyze Germany and Japan.
- » Space has an attribute of speed and range that is so lethal and so potentially powerful that what China is building can be existential so rapidly.

“America would never have time to turn to the industrial base and say, OK, spend a year building me the capability to defend our information systems, our energy grid, our economics, our transportation.” –Lt. General Steven Kwast

- » All these things will be obliterated from that high ground of space and would happen so rapidly we may not be able to recover.
- » If you own space, you could have a small nuclear device, a rather crude one, and you could wipe out big segments of the power grid. They could take down the G.P.S. system. Look at how dependent are we on satellites from a military standpoint.

WARNING:

“AMERICAN SOCIETY HAS FALLEN ASLEEP IN REGARD TO THIS DEPENDENCY ON TECHNOLOGY WITHOUT THINKING ABOUT HOW A DETERMINED ADVERSARY MIGHT USE IT AS A WEAPON AGAINST US. IN THE POWER GRID, AND OUR INFORMATION GRIDS, AND OUR TRANSPORTATION MODALITIES, WE ARE VULNERABLE.

CHINA KNOWS IT AND THEY ARE BUILDING A FORCE TO HOLD US HOSTAGE AND BLACKMAIL US AGAINST THOSE VULNERABILITIES.

THIS IS WHY THE SPACE FORCE IS ESSENTIAL. IF WE ARE NOT ON THAT HIGH GROUND TO COMPETE WITH CHINA. THEY WILL BE ABLE TO HOLD US UNDER FOOT FOR PENNIES ON THE DOLLAR.”

PAGE 7

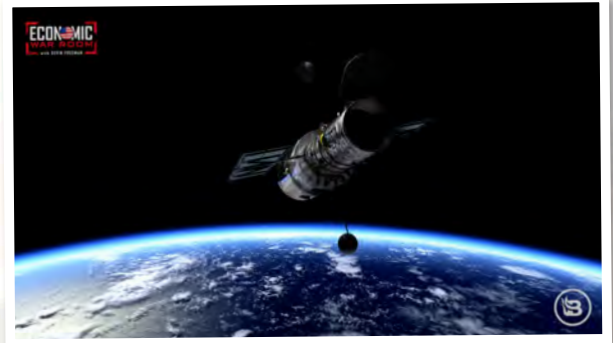

Economic War Room Quiz and the Power of Velocity from Space:

Question 1: In Science Fiction stories there are examples that you could shoot metal rods down from space and blow up entire cities. They become essentially like the asteroids that killed the dinosaurs. Is that science fiction or is there truth to that?

The Answer - It's True

Velocity is powerful. All the equations show that and it's true.

- » One tungsten rod traveling at Mach speeds has the power of a thermonuclear weapon.
- » You don't even have to fire it. You're moving at such speeds in space that it takes almost no energy to accelerate something to the kind of speeds that are catastrophic when they hit the terrestrial realm.

Question 2: This question is for U.S. Reps. Maxine Waters, D-Calif.; Rashida Tlaib, D-Mich.; Marc Pocan, D-Wisc.; and Chuy Garcia, D-Ill. **Knowing the above, do you want the US operating as guardian of space and peace or some other dictatorship ruling space?**

Their Answer? "Our mission must be to support the American people, not spend billions on the militarization of space."*

***While there is still bipartisan support for the Space Force. It is time these congressional members rethink their position and what they stand for? Currently, it does not appear to be supporting the American people or our values.**

4. The US breakthrough in transportation speed through space is a strategic asset! It is not being recognized by congress or the FAA.

Unfortunately, the Congress and FAA seem to be slowing the transportation evolution.

Transportation is always the leading technology and space is a key part of transforming transportation.

- » If you can get to the right place fast enough, you can do things to protect yourself and to increase your economy.

"My favorite story on this is when the train was invented in England, the parliament passed a law that said the train could not travel any faster than the horse, so it wouldn't compete with the status quo." -Lt. General Steven Kwast

- » **History repeats itself.** Right now, Congress and the FAA are basically telling Elon Musk he cannot launch his rockets that could transport anybody in anything to any point on the planet within an hour.
- » That transportation revolution for the global economy is being squashed because Congress is worried about something new.
- » **Our American** military made a similar mistake with General Billy Mitchell, who was talking about the importance of airpower. He warned about the Japanese using air power to attack Pearl Harbor only to be ignored, court-martialed, but then ultimately proven right. From Wikipedia:
 - Mitchell was [court-martialed](#) for insubordination after accusing Army and Navy leaders of an "almost treasonable administration of the national defense"^[3] for investing in battleships instead of aircraft carriers. He resigned from the service shortly afterward.

ATTENTION: Kwast warns, "Transportation is the key to economic vibrancy, and we are at the cusp of greatness. But guess what? If Congress is not clever, China will be the only one using Elon Musk's technology to travel anywhere in the planet within an hour for anything and anyone."

Lessons in History: As human beings we tend to cling to the status quo. This can be to our detriment as we saw in Pearl Harbor.

General Kwast walks through examples in history and why America needs to stay on the leading edge and resist business as usual or the status quo.

As human beings, we tightly cling to the status quo. We fall in love with the things that made us heroes.

- » A fighter pilot will fall in love with his or her fighter aircraft.
- » The cavalymen of the 30s and the 20s fell in love with the horse. The horse was the king of the battlefield.
 - In fact, it goes so deep that some of the studies that the cavalry sponsored basically told the leadership of the country, President Roosevelt and General Marshall, who was the chief of staff of the Army, that, "If you take the horse off the battlefield, the IQ of the soldier would drop by a significant number of points."

[Note: General Steven Kwast stood strongly against the status quo as our political leaders debated the need for a Space Force. America owes him their gratitude for his leadership and willingness to lead change.]

Again, this is how we have confirmation bias about the things we know and that we are in love with.

- » But if the Navy held to the battleship and not transitioned to aircraft carriers, we would have lost the battle at sea in World War II.
- » And if the Cavalry were allowed to keep the horse as opposed to General Marshall walking into General Herr, the leader of the cavalry and saying, "You are retiring today and we are canceling the Cavalry and going to mechanization," we would have lost World War II in the European theater.
 - The only reason Congress kept funding the horse for 10 more years was because the congressional lobbyists for the horse industry were so powerful. They couldn't stop it. And we had to spend money both on horses and on tanks.

This is human nature. We better be careful. And we, as citizens must hold our politicians accountable. They only respond to political pressure. And if there's not somebody telling them this story and forcing them to help us change, we will be victims of others who are more agile, like China and Russia.

5. It's an Economic War - A closer look at the economic and portfolio implications of space with a focus on energy, communication and asteroid mining.

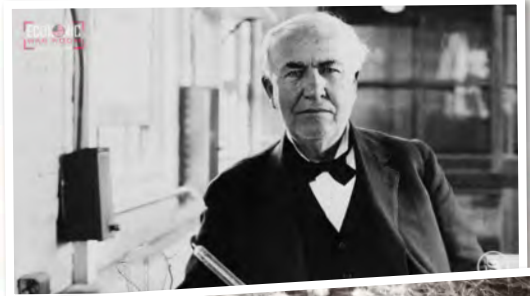

A look at the economic benefits of maintaining a space interest. Space has an attribute of a network that empowers tremendous economic marketplaces!

Several key examples include:

Energy

Space X is launching satellites. When Edison and Tesla were competing for how we deliver electricity to people, Tesla already knew and discovered the fact that you can beam power safely from one point to another without wires.

- » From space with a solar panel, we can convert the solar energy into radio waves. Just like your FM and AM radio that are safe for human beings, we can beam that power to any point on planet Earth.
- » So now imagine you're anywhere on the planet and you don't need electrical wires from a power plant.
- » You could trickle charge your cell phone anywhere on the planet. Electric cars could be charged as they are driven or parked.

Communication

Communication is also a key industry we need to be able to communicate right now.

- » There's a company called Links that already has satellites up there that trick your cell phone into thinking that satellite is a cell tower.
- » With this technology you no longer have only one bar when you're driving through the desert. You are no longer out of range.
- » You can communicate to anyone from anywhere because every satellite is a cell tower that your phone can connect to and then reconnect to anyone on the planet.

Energy and Communications are just two examples of the trillion-dollar businesses that come from somebody who's willing to put up just a handful of satellites in low Earth orbit. Who will benefit from those trillions of dollars?

China is pursuing these at a relentless pace. Unfortunately, we as a government are not.

Caution: Kwast warns about overreaching government stifling Innovation.

Our innovation also can be stifled by an overreaching government that destroys innovation through regulation and through this false idea that government is here to save the people from themselves. Instead, it should be our constitutional right, that we are the boss, and the government serves us and does what we want them to do.

China with 1.35 billion people has more geniuses than we have. **They have about 100 geniuses for every honor student we have in America.** And they are putting the money after these technologies.

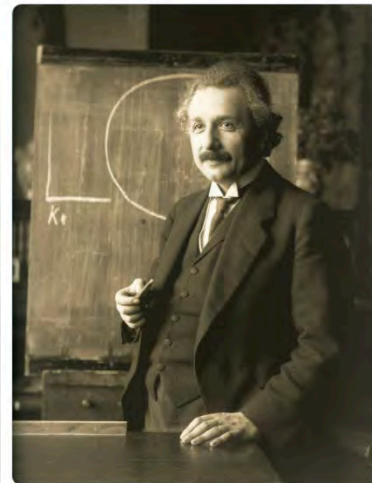

We are the most innovative culture on the planet, but the money and the focus can sometimes trump the innovation if the innovation is stifled by a government that doesn't trust its people.

[NOTE: Our government says "Trust the science. And then silences any curiosity, dissent, or questioning that goes against their political agenda.]

<https://twitter.com/SecretWeaponUSA/status/1446605419963719689?s=20>

Kevin D. Freeman
@SecretWeaponUSA

Einstein once said "Question Everything," and "the important thing is to never stop questioning." So how did we get from that to calling anyone who questions the narrative a terrorist?

5:36 PM · Oct 8, 2021 · Twitter for iPhone

IF CHINA GETS AHEAD AND DOMINATES IN SPACE, WE WON'T HAVE TIME TO CATCH UP. IF THEY DOMINATE THERE, THEY DOMINATE COMPLETELY FOR GENERATIONS.

Asteroid Mining: New industries within Earth's orbit. China plans near-earth smash and grab.

New Continents in Earth's Orbit.

- » We on the planet tend to focus on the fact that we've already discovered every continent.
- » Well, if you look at the asteroids that are out there right now, many of them are much closer than the Moon to the Earth. But they fly in orbits that are congruent or consistent with the Earth's orbit, so they are not a threat to hit us.
- » These asteroids are like entire continents.
- » Imagine that we discovered a continent the size of Africa that is only a few days travel from us right now. Well, look at all the resources, the rare Earth metals. Every asteroid is made up of the same universal stuff that the Earth is made up of.

China is focused on mining these resources, the gold, the silver, the rare earth metals of these "continents" (asteroids and other celestial bodies) to bring wealth to the Chinese economy. And we are not.

"This is frightening because this is like being Queen Isabella saying, 'No, I don't want to look at the new world. I'm not interested in that.' It would be foolish, and we've got to maintain a presence in space. We've got to have the awareness in space, and you've been telling the story and that's powerful. And I've been looking through all these things that China, Russia, India, and others are doing. We can't be last in this race."

-Kevin Freeman

6. The need for a capital infrastructure to fund leading edge innovation.

We need more capital and incubators to lead and win this innovation race!
In an Economic War, it is important to drive innovation that can solve the world's biggest problems.

An important point here is that the cost of getting to space is high creating barriers to entry. Kwast believes we as a government have a responsibility to help our young innovators get above this threshold, or we will never compete.

- » Right now, a small company that can innovate in America, can't get there because the cost is too high. It would be like building the Panama Canal with a small company.
- » Only the billionaires can participate in space currently.
 - Elon Musk can do it and Jeff Bezos can do it because they're billionaires that believe in this and see history and the future colliding.
- » We need to help more innovators to compete, many may not have all the necessary resources but there should be opportunities to fund new innovation.

Case Study - New innovation can change the world!

Kwast describes a model he is working at Genesis Global that includes a combination of a government need and supporting entrepreneurs.

The Need: Right now, every single day, 6,000 children die around the world because of a lack of access to fresh water or a lack of access to water altogether.

Through innovation the Genesis team knew this was technologically a problem that they could solve, and they have done it.

The Opportunity: To develop the future of an unlimited sustainable water supply anywhere in the world.

The Solution: Genesis Systems Global – Currently creating one of the most cost-effective means of producing industrial scale fresh water ever created.

The Genesis Water Cube is generating fresh water from air using integrated technologies never before conceived.

- » Genesis builds water generators that don't require any infrastructure. They can operate without power grid, and no traditional water source.
- » You can put it in the middle of the Gobi Desert, and it will produce abundant water providing the ability to produce food for anybody that wants to live there.
- » The launch of their first working product happened in Sept 2021 in Tampa, FL.
- » The system is going to go to a military exercise in October and then off to Texas for a permanent place in water innovation.

About Genesis Systems Global

- » The company has been in stealth mode up till now because of big lobby groups for big water and big energy.
- » This product is going to disrupt that entire sector. And the company wants to be careful to not be a baby killed in the crib.
- » Kwast shared that Genesis Systems is ultimately going the private route because the government is too slow and too bureaucratic and it is critical that the people that need water get it today.

“This is to save those 6,000 children a day (and many more adults) that die of a of thirst and hunger. This makes us resilient against famine and drought.”

–Lt. General Steven Kwast

“I love the innovation, and I love the fact that you've opened it up where it's private investors making this possible. I know you're in the very early stages, but someday I believe that your company, with Major David Stuckenberg, who is another dear friend, is going to revolutionize the world.” –Kevin Freeman

7. The National Security Investment Consultant Institute (NSIC) wants to help fund innovation.

The Economic War Room and the NSIC thank General Kwast for his help with the NSIC Institute. General Kwast is one of our key advisors, and we appreciate his leadership!

General Kwast shares why he has invested his time to help the NSIC:

Teaching the American people to defend their rights and understand that you ought to follow the money is important to winning this Economic War. That is how our government, and our country, is being taken over by other countries, whether it's China, Russia or others that weasel their way into our country in a way that gives them influence.

Look at what is happening:

- » The biggest agricultural owner in our country is China.
- » Most people don't realize that our energy market is dominated by China. Our telecommunications markets are dominated by China.
- » This is how money becomes power becomes influence.

Next, Congress and the lobbyists don't act, and we lose our freedom.

"The only way we can compete, with a tyrant like China in the 21st century, as a democracy is by the way that you (The NSIC) are doing it. Teaching a force of people that understand how money is power and using it to defend our values."

-Lt. General Steven Kwast

About the NSIC Institute:

At the NSIC (National Security Investment Consultant) Institute, we are training 10,000 financial advisors. They will weaponize \$1 trillion of American money to be that innovation and to make that difference.

We're coming out from the old, which is the woke, and we're going into new and exciting opportunities like Genesis and the Water Project. But YOU are going to need a financial advisor to help do that.

We're training and giving access to brilliant minds and ideas like Lieutenant General Kwast, like Dr. Ben Carson, like Dr. Rod Martin, and great economists and great investors.

The online training is held at Liberty University.

We started with an online advisor track and we'll be adding an on-campus track soon.

In the future we also hope to add a client track.

Do you have a financial advisor? You can nominate them for training at EconomicWarRoom.com/advisor.

Why You Should Care:

- The US Space Force is critical to maintaining peace and our values.
- Without a Space Force operating as guardians,
 - Our entire electric grid is at risk,
 - Our communications and information are at risk,
 - Our Mobility is at risk.
- Space has an attribute of speed and range that is so lethal and powerful. That is what China is building and it can be existential to the US.
- Space, it's right above your head. Just above those clouds is the boundary of space. That is where China is operating now.
 - China will be able to touch us and affect our economy and our security.
 - Key infrastructure will be obliterated from that high ground of space and it would happen so rapidly that we may not be able to recover.
 - Adversaries could take down G.P.S and our military satellites.
- There is a significant economic impact, and this can be "green" with clean environmental mining of rare earth minerals in space. China wants to dominate in obtaining these minerals. Space also holds the key to "green" energy that works all the time.
- Some in Congress are clueless to its strategic impact on our national security and economic infrastructure. They seem to be influenced by lobbyists and foreign infiltration.
- The FAA is limiting our ability to lead in new areas of high-speed space transportation providing competitive advantage to China.
- To get out of our debt and improve the world's problems, America needs to lead with new innovation and capital investment to create breakthrough.

Action Steps:

1. Learn more about Genesis Systems Global at <https://genesissystems.global>.
2. Ensure your representatives understand the importance of the Space Force and send this Economic Battle Plan™ to them as a reminder of its strategic importance.
3. As it relates to high-speed space travel, encourage your representatives to communicate with the FAA on the importance of keeping our leadership position.
4. The best way to compete with tyrants like the Chinese Communist Party is by weaponizing our money to defend our Liberty, Security, and Values. The NSIC is critical to making that happen. Money is power. Working together, we can make an impact.
5. Weaponize your money toward principles that support Liberty, Security, and Values (LSV) and stay on the front end of new innovations with a Financial Advisor that understands what's ahead. You control your giving, spending, and investing. Nominate your financial advisor to attend our Founders' class.
 - **Investing**, we suggest you get a like-minded financial advisor. We've done surveys and a clear majority of investors want an advisor who matches with their political and cultural beliefs. Unfortunately, Wall Street is pushing for you to just take what they offer to force a leftist agenda on you.
 - o "If your advisor isn't willing to match your investments with your values, send them to us for training and education. If they won't do that, I can promise you that there are lots of other advisors looking for new clients." -Kevin Freeman
6. **It is time to fight the economic war we are facing. Nominate your financial advisor at EconomicWarRoom.com/advisor** and let them know that you think this would be a great opportunity for them. Classes are launching and our list is growing fast.
7. **Also, if you have not already done so, please sign up for our free weekly Economic Battle Plans™ at www.EconomicWarRoom.com**
 - o If you are following Economic War Room you will be on the leading edge as it relates to global threats, geopolitical analysis, and how you can weaponize your money to strengthen America. Your money, livelihood, and way of life are at risk and these tools are designed to mobilize America to protect their economic liberty.

ECONOMIC BATTLE PLAN™

SPACE: MISSION CRITICAL **5.160**

CLEARED FOR RELEASE 10/14/2021 (ECONOMIC BATTLE PLAN™ POINTS: 100)

In the **Economic War Room®**, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve America’s problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The small ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.

We need more Economic Patriots on the team! Consider what you can do now to help strengthen America or even help someone in need. Keep in touch with your congressional representatives. Choose from the list or set your own goals:

- ✓ At our [Economic War Room®](#) website, sign up to [BlazeTV](#) or [LiftableTV](#) for our complete weekly shows. Please use our code (**ECON**) from that link for a discount and FREE trial.
- ✓ Follow, like, comment, and share on [FB](#) and [Twitter](#). Look for short video segments on [FB](#) and [Rumble](#) and make sure. We recognize these tools may be compromised at times, but if they are not filtered, they are the major platforms available to reach out to the public. [Know that alternatives to the social platforms listed above are under EWR consideration.]
- ✓ Check out XOTV (<https://xotv.me/channels/233-economic-war-room>), a new free speech video platform that Economic War Room is proud to partner with. Access is FREE but consider making a donation to EWR on that website to help with Economic War Room’s research and production costs.
- ✓ You are welcome to share this Economic Battle Plan™ and our short video segments with friends on [FB](#) or [YouTube](#). We set up the Economic War Room® to be your resource for information, preparation, and mobilization.
- ✓ Do this now! Have a financial action plan based on multiple geopolitical scenarios developed now. Advanced preparation is key. Trying to figure what to do when an economic event happens is usually too late.

Shareable Quote:

“The only way we can compete, with a tyrant like China in the 21st century, as a democracy is by the way that you (NSIC) are doing it. Teaching a force of people that understand how money is power and using it to defend our values.”

–Lt. General Steven Kwast
