

## The Destruction of Individual Liberty Could Be the End of America

America is under threat, at least the America we've known over the past two centuries, the America of innovation and entrepreneurship and individual liberty. We're seeing individual liberty redefined as the ability to cross-dress and read stories to kids at libraries.

Actual individual liberty is under serious attack by collectivists who want to strengthen unions, deny private property, eliminate competition, and limit risk-taking.

**⚠ WARNING: We are in an economic war against your money, your livelihood, and your way of life.**

If you want to start a business or raise your kids by your own values or make personal medical choices (other than for gender-bending surgery), your liberties are being diminished. That's not just bad for you; it's bad for society and could be the end of America and terrible for the world.

**In this briefing we will discuss the following:**

- » What makes America exceptional?
- » The conniving schemes to eliminate individual creativity and replace it with bureaucracy.
- » Collectivism is a threat to the American way of life, and in some ways, the future of humanity.
- » America – the breeding ground for innovation and creativity.
- » The emergence of global prosperity.
- » Collectivists are trying to destroy capitalism and innovation.
- » Good news: A commanding shield against the destruction of the individual.

**YOUR MISSION:** To fully understand the spirit of individual liberty and how essential it is to America's future.

- » It is critical that liberty-minded Americans stand together and defeat the conniving attacks to eliminate our liberties from around the world.

Page 1

**⚠ ATTENTION:** America's individual liberties are under serious threat to be redefined and eliminated. This could be the end of America and terrible for humanity!

Ep. 6-223 (OSINT) Open-Sourced Intelligence Report. This is an exclusive teaching series from Kevin Freeman. Kevin Freeman is considered one of the world's leading experts on the issues of Economic and Financial Terrorism. He has consulted for and briefed members of both the U.S. House and Senate, present and past CIA, DIA, FBI, SEC, Homeland Security, the Justice Department as well as local and state law enforcement. His research has been presented in critical DoD studies on Economic Warfare, Iran, and Weapons of Mass Destruction presented to the Secretary of Defense and the Under Secretary of Defense, Intelligence. He has traveled extensively with research trips to Russia and China and throughout Europe and the Americas. He is also a Senior Fellow at the Center for Security Policy. Kevin is a New York Times Best Selling Author.

## The True Power of Liberty!!

### What Makes America Exceptional?

- » **Is it the people?** No, it can't be that.  
→ We are everybody else from everywhere else.
- » **Is it our geography, education, the weather, or our religion?**  
→ Some of those may play a small role. But they don't account for American success.

The real notion of **American exceptionalism is based on Individual Liberty as enshrined in the Constitution.**

**DO NOT UNDERESTIMATE THE POWER OF LIBERTY OR SOON IT WILL BE TOO LATE!**

## Lessons in History - "O Holy Night" and the Power of Liberty

### "Oh Holy Night," the first radio broadcast ever recorded! Why?

- » On Christmas Eve, 1906, at 9 pm Eastern time, ships in the Atlantic ocean heard what has been described as the first "real" radio broadcast, not just dashes and dots of Morse Code. **Listeners were astonished to hear "Oh Holy Night" played by violin and a human voice signing the final verse of the song. This was an amazing achievement. And it was the first radio broadcast ever recorded.**

There are several remarkable things about this broadcast.

- » **The first was the choice of material**, Oh Holy Night, especially the emphasis on the last verse. At the time, this beautiful hymn was once quite controversial.
- » **It was banned by the Church** because of its lack of musical taste and "total absence of the spirit of religion," or so they said.
- » The song was written in **France in 1847** as "Cantique de Noel" **but was soon forbidden to be performed in church.**
- » **The Abolitionists loved it!** A few years later, the song was discovered by American John Sullivan Dwight and the lyrics were translated to English in 1855, **the song became an instant classic, especially among American abolitionists.**

The key is the last verse:

"Truly He taught us to love one another;  
His law is Love and His gospel is Peace;  
**Chains shall he break, for the slave is our brother,  
And in his name all oppression shall cease.."**

**This Christmas hymn established that slavery was wrong and in the name of Christ it must be abolished, a controversial message at the time.** In America, it was certainly powerful, just a decade before the Civil War.

It was also powerful coming from a Canadian scientist in 1906 named Reginald Fessenden, the inventor of radio telephony who at one time worked with Thomas Edison.

Several other points to be taken from this time in history:

- » First, true Christianity stood against slavery in the 19<sup>th</sup> century, and “Oh Holy Night,” proves the point.
- » Second, by 1906, four decades after the Civil War, **this same Christian spirit of INDIVIDUAL LIBERTY was instrumental in the spark of innovation that was rapidly transforming the world.**

**ATTENTION:** As Individual Liberty stood in America, true innovation was released that changed the world!

In a span of a few decades, the electric light, automobiles, the radio, and even airplanes were either invented in or commercialized in America. Sometimes these great inventions were the brainchildren of people from other countries. But they found root and success in America like nowhere else.

---

**Despite these phenomenal successes in our early history, there were those who wanted to eliminate individual creativity.**

**1. The Conniving Scheme to Eliminate Individual Creativity and Replace it With Bureaucracy.**

**Beware the Dangers of Bureaucracies and groupthink:**

- » They don't invent.
- » They don't create.
- » They don't improve.

**Look at the typical business meeting as a great example.**

- » Most are mind-numbing, inefficient, time wasters, soul killers.

**Do you really want the politicians running your life?**

- » Too often the people we have running our lives are politicians – they are the overlords of bureaucracy.
- » Do you trust those people?

Ask yourself, Would you rather go to Chick-Fil-A or the DMV?

→ It's the difference between being treated as an individual or being treated as a number. One is based on free markets. The other? Government bureaucracy.

**2. Top-Down Control is Out of Control!**

**The key distinction is individual creativity versus government or even corporate bureaucracy.**

- » **The battle in the political realm:**  
It's individual liberty versus socialism, collectivism, and big government. It's top-down control.
- » Globally:  
Most of the world is controlled by large government, with a few elites at the top living the good life while the rest of us plod along. That's true in dictatorships, socialist nations, and even democratic socialism.

**America was the exception, she stood for Liberty and took on the threats of top-down control!**

**3. As Urban Centers Grow, so Does Collectivism:**

**Look at Election Maps and we can see the difference in ideology:**

**It's red states versus blue states, inner cities versus rural.**

- » Even in the red states like Texas, the big cities, like Houston, Dallas, San Antonio, Austin, and El Paso are solidly Democrat.
- » Why? When you move to a city, you become paralyzingly interdependent, and you turn to the government for more and more services.

**The downside of a collectivist vs. an individualist culture.**

**In urban collectivist areas:**

- » You don't know your neighbors.
- » You don't know the person working next to you.

**In Farming communities or rural areas:**

- » Farmers are self-reliant.
- » They depend on neighbors as individuals but don't demand that their neighbors subsidize them.

**It's really a stark difference in our culture. One is more collectivist and the other is more individualist.**

**There's a war on farms going on right now. Farms, guns, food production, and anything from rural America.**

- » The green movement is opposed to cattle, fertilizer, and a lot of things that farmers depend on.

**4. Collectivism is a Threat to the American Way of Life, and in Some Ways, the Future of Humanity.**

**WARNING: There's a huge campaign to get everyone off the land and into big cities.**

Why? It is all about Control.

- In cities, you have smart meters, zoning rules, lockdowns, restrictions, neighbors spying on you, and cameras everywhere.
- People in cities tend to be collectivists. They want bigger government benefits.
- People in rural areas are individualists. They want less government intrusion.

**China's big push to big cities has spread around the world.**

- » In the year 2000, only one-third of China lived in cities.
- » Two-thirds of China live in big cities today.
- » That's unprecedented urbanization pushed by the Chinese Communist Party – because Big Brother works best in cities.
- » Big cities become corrupt. We've all seen it in Chicago, Detroit, and Philadelphia.

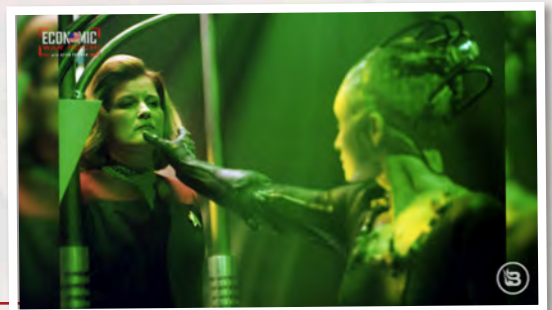

**A Lesson From The Borg on *Star Trek*:  
Collectivism concentrates power – Power corrupts,  
and absolute power corrupts absolutely.**

- » Collectivism saps the strength and the creativity out of the individual, like the **Borg on *Star Trek***.
- » The Borg is one of the worst enemies ever faced by *Star Trek*. It's a collective that assimilates everyone and everything it encounters. It's transhumanist, kills individualism, and moves like locusts across the galaxy.
- » The mantra of the Borg is "**Resistance is futile.**"
- » The Borg is a "hive mind" called the Collective.
- » They forcibly transform individuals into drones with the **goal of achieving perfection.**

**WARNING: Whenever you hear about the World Economic Forum, or Marxists, or Socialists, see them as the Borg demanding you to "Give up your liberty and join the collective."**

- » The dirty secret of Star Trek's Borg is that there's a "queen" in charge who does as SHE pleases. Sort of like elites who want the rest of us to live like drones while they're in charge of everything.

**5. America – The Breeding Ground for Innovation and Creativity For All Citizens!!**

“Only four percent of the population of the world are able to call themselves Americans. And yet, every year that little four percent writes more books, more plays, more symphonies, more copyrights, more inventions than the other 96 percent combined.”

—Former Ohio Congressman Bob McEwen

**America’s Amazing Inventors – A powerful acknowledgment of the individual, no matter the race or gender.**

- » Americans invented the light bulb and the telephone.
- » Americans decided that there could be an airplane and invented one.
  - Great science societies and experts all said it would take 10 million years before a man could achieve flight. Two months later, two individuals named Orville and Wilbur prove them wrong.
  - When you see an airplane fly, it has tires on it. Why? Because an American named Charlie Goodyear invented the vulcanization process for rubber.
  - Airplanes have lights flashing. Why? Because Thomas Edison invented the light bulb.
- » There are skyscrapers all over the planet. Why? Because an American named Elisha Otis in Vermont invented the safety elevator
  - Skyscrapers are in places where it’s 100 degrees because Willis Carrier, an American, invented the air conditioner.
- » The revolution of the iPhone was made possible in part by Gil Amelio, who invented the optical sensor that makes the camera work (<http://cwc.ucsd.edu/people/gilbert-f-amelio>). Gil went on to be CEO and Chairman of Apple.

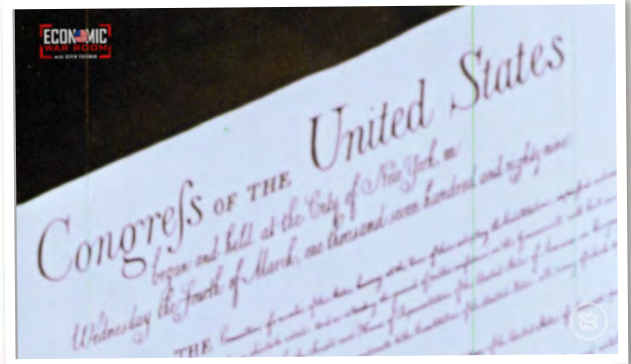

**The list goes on and on. But why America, and not the rest of the world?**

**6. Our Constitution Gives Individuals the Power to Innovate and Benefit!**

**What sets America apart is individual liberty, the breeding ground for innovation and creativity. Collectivism can't compete when the playing field is fair.**

Our founders knew this. They created a provision in the Constitution so Congress could create patent rights found in Article 1, Section 8, clause 8, regarding intellectual property.

- » In the Constitution, Congress was granted authority to promote the progress of science and useful arts by securing for a limited time to authors and inventors – individuals – the exclusive right to their respective writings and discoveries.
- » President George Washington signed the first patent law in 1790, and it said, “he, she, or they” could be protected.
- » That’s about individuals. It’s a powerful acknowledgment.
- » No matter the race or gender. Women inventors could own patents in America even before they could vote.
- » Skin color wasn’t a barrier either. There’s a long history of black American inventors making the world a better place.

“**Collectivism** is where the individual is seen as being subordinate to a social collectivity such as a state, a nation, a race, or a social class. Collectivism may be contrasted with individualism (q.v.), in which the rights and interests of the individual are emphasized.”  
—[Britannica.com](https://www.britannica.com/topic/collectivism) (<https://www.britannica.com/topic/collectivism>)

**Making the World a Better Place –  
Dr. Ben Carson on the Long History of Black  
American Inventors.**

*I don't care what your race is. You can walk down the streets of Dallas, Texas, and you could give them a black history lesson they'd never forget.*

- » *You could start out by pointing to his shoes and say it was John Ernst Matzeliger, a black man who invented the automatic shoe lashing machine, which revolutionized the shoe industry throughout the world.*
- » *It was Charles Brooks, a black man who invented the refrigeration system for trucks later adopted for airplanes and trains.*
- » *It was Garrett Morgan, a black man, who invented the traffic light. He also invented the gas mask that saved lots of lives during the war.*
- » *Henrietta Bradbury, a black woman, invented the underwater cannon. She made it possible to launch torpedoes from submarines.*
- » *Madam C.J. Walker, a black woman who invented cosmetic products for women of dark complexion, was the first woman of any nationality in this country to become a millionairess on her own efforts.*
- » *Charles Drew, an American surgeon and medical researcher, was instrumental in developing improved techniques for blood banking and blood plasma understanding.*
- » *Daniel Hale Williams was a black surgeon who performed the first successful open heart surgery in the world.*
- » *Lewis Latimer, Thomas Edison's right-hand man, was black. It was Lewis Latimer who came up with the filament that made the light bulb work for more than two or three days. He invented the electric lamp, incandescent lighting and diagrammed the telephone for Alexander Graham Bell. He was a tremendous inventor in his own right. Most people have never even heard of him.*
- » *Andrew Beard invented the Jenny Coupler, an automatic railroad car coupler, which spurred on the Industrial Revolution.*
- » *Elijah McCoy invented the automatic locomotive lubricating system. In fact, Elijah McCoy had so many inventions, people would say, Is that a McCoy? Is that the real McCoy?*

***The fact of the matter is those were tremendous contributions and I'm just barely touching the surface.***

“I can take that same walk down the street for virtually any nationality in this country and point out tremendous contributions that were made. That’s why we’re called the United States of America. And we should not let anybody destroy that for us.” —Dr. Ben Carson

**Distinguished Women Inventors.**

**Women inventors also changed the world with:**

- » Paper bags were invented by Margaret Knight.
- » The dishwasher by Josephine Cochrane.
- » The Life Raft by Maria Beasley
- » Windshield wipers by Mary Anderson.
- » The first computer language, COBOL, was invented by Admiral Grace Hopper.
- » Actress Hedy Lamarr invented frequency code hopping that enables modern WiFi, GPS, and Bluetooth.
- » Stephanie Kwolek invented Kevlar.
- » Patricia Bath invented a laser that dissolves cataracts.
- » The list goes on and on for women and for minorities of all types.

**Invention is by Individuals, not Races or Genders.**

“When people see themselves as cogs in the collective, they don’t have the spark of creativity and invention. Remember the Borg? They don’t invent technology. They pretty much steal it and incorporate it. That’s what communism does. That’s what the Chinese Communist Party has done for the past two decades. We call it Unrestricted Warfare. The Borg

can’t advance unless they’re leeching off other civilizations, and humanity does not invent without individual liberty.” —Kevin Freeman

## 7. The Emergence of Global Prosperity.

**The world's average economic growth was stagnant for 1,000 years.**

Did you know that as late as 1820, the world's per capita GDP was roughly the same as it had been a thousand years before?

- » The average annual economic growth rate prior to 1820 was about 1/20th of 1% for 1,000 years.
- » Around 1820 America became a hub of growth for the whole world. Why? Because of individual liberty!

**A paper published by INSEAD University explains how global prosperity emerged as the convergence of four factors:**

- » **One, the greater transfer of knowledge.** Prior to 1820, the labor unions or the guilds would hold on to their knowledge and not share it so that they could protect their economic position.
- » **Two, the effective protection of property rights.** Just like we talked about regarding patents in Economic War Room® episodes [208](#) and [217](#).
- » **Three, healthy competition between nations.** Inventors not welcome in one country could take their brilliance elsewhere. And a lot of them came to America.
- » **Four, the development of financial instruments that dynamized innovation and risk-taking.** That's investing and America did it best.

**All four of those factors are based on individual liberty, and they were all adopted in America. And the world was blessed as a result.**

- » **All four right now are under threat by collectivists who want to strengthen unions, deny private property, eliminate competition, and limit risk-taking.**
- » **Doing this would take us back to medieval times, literally.**

Even Bono, the activist-lead singer from U2, understands the power of individual liberty and capitalism. Here's a quote from a recent interview he did with *The New York Times*. He said:

“I ended up as an activist in a very different place from where I started. I thought that if we just redistributed resources, then we could solve every problem. I now know that's not true. There's a funny moment when you realize that as an activist. The off-ramp out of extreme poverty is commerce. It's entrepreneurial capitalism.” —Bono

As Jim Pethokoukis wrote, “Bono is unquestionably correct. In 1990, about 38% of the world's population lived on less than \$2.15 per day, the international definition of extreme poverty. In 2019, only about 8% live below that line. And yes, that's adjusted for inflation and the cost of living. What used to be a problem for over a third of the world's people is now a problem for less than a 10th of them.” <https://www.nationalreview.com/2022/10/bono-has-found-what-hes-looking-for-capitalism/>

So, what changed in 1990? That was just after the Berlin Wall fell when individual liberty began its global ascent. We exported Americanism.

**Politicians, socialist governments, and the World Economic Forum have conspired to remove Americanism, to replace individual liberty and entrepreneurial capitalism with their own brand of collectivism. That's inherent in the Green New Deal. It's the basis for the Great Reset.**

## 8. Collectivists are Trying to Destroy Capitalism and Innovation.

### **Russian Economist Predicted the Rise of Collectivism 100 Years Ago.**

INSEAD University tells us that: A century ago, Joseph Schumpeter (1883-1950) was pessimistic about the future of capitalism. He believed that powerful incumbents – think conglomerates – would eventually dominate every sector. By stifling competition, they would kill innovation and growth softly.

- » That's precisely what we see from democratic socialism. That's what we see from the World Economic Forum. They're attempting to replace individual liberty with state-endorsed, corporate-driven, globalist, collectivism. Again, think the Borg from Star Trek.

- » **Schumpeter's fear has come to pass.** The great innovators have become rich and powerful, and they use that power to stifle competition.
- » Google started with the motto "Don't be evil." Well, it's too late for Google ([as shared in EWR episode 214 with Dr. Robert Epstein](#)).

### Collectivism Goes Beyond Politics to Corporate America.

Big companies don't want innovation that threatens their power. They want people as employees, not entrepreneurial threats.

- » We've seen how big tech like Google and Twitter have worked to control us all: by directing how we think they've tried to influence our elections.
- » We've seen how Microsoft founder Bill Gates wants to control your health policy and limit world population.
- » We've seen big corporations working with socialists to control that population.

**⚠ WARNING: Companies are Pushing to Make People Employees, Presumably so They Get Corporate Benefits (but really so they can control them).**

- » One example – independent Uber and truck drivers in California now must be classified as employees rather than independent entrepreneurs. Of course, there are advantages to being an employee, but it also interferes with individual liberty.
- » Some people drive Uber or Lyft or do other gig jobs just to make money on the side to start their own business or invent things or just have personal freedom.
- » But the government makes it exceedingly difficult to start a new business, and it's getting harder every day. They want all but the elite to work in their collective.
- » They even have school-to-work programs to get everyone as "cogs in the machine."
- » **It sometimes sounds noble, but it stifles individual liberty and creativity.**
- » Even our patent system has switched from favoring the inventor to favoring big corporations, as we explained in episodes [208](#) and [217](#).

**9. Good News: A Commanding Shield Against the Destruction of the Individual.**

**YOU are the answer – the little ships (like Dunkirk)! You should weaponize your money to support Liberty, Security, and Values.**

- » We need to democratize investing and give you the opportunity to invest in good, new entrepreneurial inventions.
- » For too long, we've been told to "just invest in the stock market through an index fund and let it ride."
- » But then you learn that the ESG movement has hijacked corporate boardrooms to force their policies on you.
- » YOU are the owners, not the slaves of YOUR investment portfolio.

**It's time to stand up for Liberty, Security, and Values (LSV).**

- » But don't try this alone.
- » Don't try this at home without a financial advisor. Do you have one?
- » If you do, don't you want them sharing your values and investing to protect your values?

**That's why we started the NSIC Institute.**

- » We want to bring back individual liberty, both for investors and inventors.
- » To compete with the big players, we need to train 10,000 financial advisers. That would be \$1 trillion (\$1,000,000,000,000) of capital.
- » We have started an online course at Liberty University. It's an eight-week course. We have another one that will launch very soon.

**If you know a financial planner, a stockbroker, an insurance agent, a CPA, send them to us. And they can learn more looking at [www.nsic.org](http://www.nsic.org).**

- » In this course, they're going to learn how the collectivist threat coming from the Chinese communist, globalists, and domestic Marxists threatens you.
- » They'll do a deep dive into the threat of ESG (environmental, social, corporate governance). This is just a progressive agenda to control energy and food and population and "social justice," a buzzword for equity or CRT. Really, it's just socialism and racial tensions.
- » The "G" is governance. It's a means of progressives to take over corporate boardrooms the way Mussolini's fascists took over Italian companies.

**Instead of ESG, we train investors in LSV (Liberty, Security, Values).**

## **WHY SHOULD YOU CARE?**

- » America is exceptional, but it is under threat.
- » There are conniving schemes to eliminate individual creativity and replace it with bureaucracy.
- » Your money, livelihood, and way of life are under attack!
- » Collectivism is a threat to the American way of life, and in some ways, the future of humanity.
- » America has been the breeding ground for innovation and creativity.
- » Global prosperity is under attack.
- » Collectivists are trying to destroy capitalism and innovation.
- » There is Good News: We have a commanding shield against the destruction of the individual if we stand for LSV (Liberty, Security, and Values). The NSIC is a big part of the solution.

## **ACTION STEPS**

1. Pray, asking God to show you where the liberties He has given us are being attacked and how you can help restore America to a God-fearing, God-honoring, prosperous nation that will bless the entire world.
2. Study why America has been exceptional and defend the many ways individual liberties are essential to the future of our country and all of humanity.
3. Stand against political, economic, and corporate collectivists by promoting capitalism, creativity, and staunch individualism.
4. Ask God to empower you to stand up and speak out against evil – to be a genuine advocate of truth, justice, and liberty in America and around the world.
5. Pray that God will show you how to get your money right with Him, so you can make a difference in America.
6. Expect God to answer your prayers and thank Him for doing so.
7. Forward this to all your friends and loved ones and get them to take action.
8. Join us weekly in the Economic War Room. We are building new solutions with thought leaders that come through our doors every week.
9. Watch or Listen to Economic War Room (<https://www.economicwarroom.com>) and study the resources to help you understand the geopolitical landscape and threats against your money, your livelihood, and your way of life to better prepare you to enter the battle.
10. If you have a financial advisor, make sure they have your values and interests at heart. Make sure they really understand the damage that ESG investments would cause to our future. Suggest that they become part of the NSIC institute and nominate them to participate in our online certification (see below).

**ATTENTION:** Remember if you have not contacted your financial advisor, it is time to make it happen now. Have him or her go through our training. Or look for a new advisor if she or he won't.

**IMPORTANT (and thus bears repetition):** If you have a financial advisor make sure they are aligning your investments with your values and that they understand the economic war being waged against you. (See more on Weaponizing your money below)

1. Financial Advisors sign up for the online NSIC class at Liberty University. **If you have a financial advisor make sure they see this link: [CLICK HERE](#)**

Also, you can nominate your financial advisor to participate in the NSIC Institute at [www.NSIC.org](http://www.NSIC.org) and we will reach out to them.

**Join us weekly in the Economic War Room®.** We are building new solutions with thought leaders that come through our doors every week. Understanding the geopolitical landscape and threats against your money, your livelihood, and your of life will allow you to be better prepared as the Great Reset is waged against America. Be sure to sign up for our weekly updates at <https://www.economicwarroom.com>.

2. It is time to weaponize your money, see below as it relates to finding an NSIC advisor. **We are in an economic war, as you seek ways to Weaponize your Money in your Investments, Spending, and Giving, consider an NSIC trained financial advisor.**

Make sure your financial advisor has your values and interests at heart. Make certain they really understand what ESG investments mean for our future. Suggest that they become part of the NSIC institute and nominate them to participate in our online certification at [EconomicWarRoom.com/advisor](http://EconomicWarRoom.com/advisor).

Financial Advisors go [www.NSIC.org](http://www.NSIC.org). Be sure to sign up for more information at <https://www.nsic.org/nominate.html>. **If you do not have a financial advisor**, now is a good time to get one. We will soon publish NSIC advisors who have participated in the training and elected to become part of the NSIC Institute.

3. Weaponize your money toward principles that support Liberty, Security, and Values (LSV). You control your giving, spending, and investing. Nominate your financial advisor to attend our next class at Liberty University February 2023 - [CLICK HERE](#)
  - **Investing.** We suggest you get a like-minded financial advisor. We've done surveys and a clear majority of investors want an advisor who matches with their political and cultural beliefs. Unfortunately, Wall Street is pushing for you to just take what they offer in order to force a leftist agenda on you.
    - o "If your advisor isn't willing to match your investments with your values, send them to us for training and education. If they won't do that, I can promise you that there are lots of other advisors looking for new clients." –Kevin Freeman
    - o If you are following Economic War Room®, you will be on the leading edge regarding global threats, geopolitical analysis, and how you can weaponize your money to strengthen America. Your money, livelihood, and way of life are at risk and these tools are designed to mobilize America to protect our economic liberty.

In the **Economic War Room®**, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve America’s problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The small ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.]

### Shareable Quotes:

“Whenever you hear about the World Economic Forum or Marxists or Socialists, see them as the Borg demanding you to ‘Give up your liberty and join the collective.’”

—Kevin Freeman, CFA

“I ended up as an activist in a very different place from where I started. I thought that if we just redistributed resources, then we could solve every problem. I now know that’s not true. There’s a funny moment when you realize that as an activist. The off ramp out of extreme poverty is commerce. It’s entrepreneurial capitalism.”

—Bono
