

A Gold Bullet for CBDC (or the Great Reset)

The frightening reality of central bank digital currency is happening in America this year!

In the Economic War Room®, we've addressed so many challenges: inflation, pandemic, election malfeasance, the risk of food shortages, space warfare, stock market collapse, debt and pension crisis, and socialism.

The challenge we face today may dwarf them all. Or maybe it rolls them all up into one big package that will be sold to you as something that you need, something that will benefit you. But in reality, it's dark, it's deceptive, it's destructive.

In this briefing we will review the following topics:

- » President Biden's alarming Executive Order.
- » A plot to take control of the global monetary system using Central Bank Digital Currencies.
- » The threat of digital dollars.
- » How we can combat the future of digital money.
- » Reality: transactional gold is money.
- » America is facing a disastrous and unprecedented time in its economy.
- » Right now, we have a golden opportunity - the most important economic moment of our lifetime.

YOUR MISSION: Recognize and act on two realities:

- 1) Digital currency is deceptive and destructive to our liberties and America's economy.
- 2) Gold is money and we may be facing the most important economic opportunity of our lifetime to save America.

⚠ ATTENTION: The push for digital currency is a profound threat to the global monetary system. It's not a time to sit around and worry. It's time to take action!

Ep. 6-224 (OSINT) Open-Sourced Intelligence Report. This is an exclusive teaching series from Kevin Freeman. Kevin Freeman is considered one of the world's leading experts on the issues of Economic and Financial Terrorism. He has consulted for and briefed members of both the U.S. House and Senate, present and past CIA, DIA, FBI, SEC, Homeland Security, the Justice Department as well as local and state law enforcement. His research has been presented in critical DoD studies on Economic Warfare, Iran, and Weapons of Mass Destruction presented to the Secretary of Defense and the Under Secretary of Defense, Intelligence. He has traveled extensively with research trips to Russia and China and throughout Europe and the Americas. He is also a Senior Fellow at the Center for Security Policy. Kevin is a New York Times Best Selling Author.

1. President Biden's Alarming Executive Order – Number 14067.

The Executive order is 37 pages long, dated March 9, 2022.

- » It starts off, “By the authority vested in me as president by the Constitutional laws of the United States, it is hereby ordered as follows.”
- » It goes on and talks about human rights, financial inclusion, equity, energy demand, and climate change.
 - Now we're seeing progressivism coming through.
- » It lists objectives. It lists mitigating illicit finance and national security risks.

“Section 1 policy has profound implications for the protection of consumers, data privacy, security, financial stability – being **sold to you as something really good for you.**” —Kevin Freeman

Remember, as he has said in his speeches, Biden and his comrades believe the greatest national security risk may be patriot-loving Americans.

Here are six major research reports written to support or encourage Central Bank Digital Currency, also known as CBDC.

- » September 2022 – from the Office of Science and Technology Policy.
- » Also from the Federal Reserve, Fed’s Notes on programmable Money (think about the staggering implications).
- » June 23rd, 2021 – the Bank for International Settlements.
- » March 2018 – the Atlantic Council CBDC Tracker.
- » December 2022 – the IMF’s (International Monetary Fund) FinTech Notes.
- » January 2022 – the Federal Reserve Board of Governors Report.

All the above are very favorable to CBDC, saying this is the destiny of central banks. Twenty nations are planning to test-launch Central Bank Digital Currency in 2023.

Here are several other reports that warn against CBDC.

- » One is from the Cato Institute, titled “CBDC and Freedom are Incompatible.”
- » The other is from Bitcoin Policy Institute, “Why the US should Reject CBDCs.”

ATTENTION: The Fed in New York is now proceeding with a 12-week test of programmable digital dollars with:

- » Mellon Bank
- » Citibank
- » HSBC
- » MasterCard
- » PNC Bank
- » SWIFT Protocol
- » TD Bank
- » Truist
- » US Bank
- » Wells Fargo
- » The Monetary Authority of Singapore.

The Fed wants first mover advantage. In fact, they said it flat out in a paper they wrote on November 25th, 2022.

2. Critical Questions About the Threat of Digital Dollars.

The Most Modern Form of Money.

It's being sold to us as central bank digital currency. **It is literally electronic money made from thin air that the government can control.**

With it, the Fed can control:

- » **Everything you buy.**
- » **Everything you sell.**
- » **They can monitor you.**
- » **They can limit where you transact.**

Number 1 – Is this real? Absolutely it's real and is endorsed by the leading authorities, including the Bank of International Settlements, IMF, the Federal Reserve, and the White House. Of course, it's real. They're working on it rapidly.

Number 2 – What does it mean to me?

- » It's a threat to your privacy.
- » It's a control mechanism.
- » It's a policy mechanism.
- » It is declaring equity, which means they can take money from one group and give it to another. That's equity.
- » It's a means of taxation. If they have central bank digital currencies where all your currency is completely numbered, and on an electronic ledger where everybody can do it, they can take the tax out when they want it.
- » It's a means of enacting climate change and energy taxes.
- » It's a means of implementing social credit scores.
- » It's a means of personal control at the individual level. Can you imagine them controlling your speech?
 - PayPal recently said if you've got a PayPal account and you say "hate speech" on the Internet, they can take \$2,500 from your account.
 - If PayPal thinks it can do it, what do you think the government thinks it can do?

Number 3 – How will they convince us to use it?

- » They're going to offer it for free. And if you use it, you'll get free money, but once you start on it, you'll get locked in.
- » Remember, the vaccine was voluntary until it was mandatory. This will start voluntarily and seem like a benefit.

Number 4 – How soon could this be implemented?

- » They're doing it right now with a dozen banks in New York.
- » They're planning to implement this as soon as June of this year – at least on a trial program across the nation.
- » It could happen in 2024, perhaps before the election.

Number 5 – Is this the “mark of the beast”?

- » The Bible, in Revelation 13:16-17 (NKJV) says, “Also it causes all both small and great, both rich and poor, both free and slave, to be marked on the hand, the right hand or the forehead, so that no one can buy or sell unless he has the mark that is the name of the beast or the number of its name.”
- » That's where we get that 666 idea.
- » Is it the mark of the beast? It might be. It might not be, but it sure sounds a lot like the same kind of control mechanism. You can't buy or sell without a central bank digital currency (CBDC).

Number 6 – Why now? For a lot of reasons.

- » Because they can. The technology now enables it.
- » The Chinese have developed their digital yuan. The federal government is fearful that the Chinese may get ahead of us.
 - Why is China inventing a digital yuan? So, they can control their people. It is the exact same reason they want it here. In China they already have the social credit scores.

- » The real reason – the bitcoin threat.
 - Bitcoin got away from them. They had no idea that something worth a penny could be someday worth \$60,000. The federal government realized they can't control it; it allows for privacy, and it has all these features.
 - Instead, the federal government produced something that looks like bitcoin but operates under their complete control.
- » There's also the reason that we have \$32 trillion worth of debt, and the federal government is worried that if they don't take control of the monetary system, maybe it will take control of them.

Number 7 – Can it be stopped?

- » I don't think it can be stopped, but I think we can head it off.
- » We can create something, an alternative, that will be better and just relegate the central bank digital currency idea, the evil one, to the dustbins of history.
 - This is why we have an Economic War Room.
 - This is why we've had all these experts here.
 - This is why you're reading our briefings, and we will help inform you on what you need to do about this.

3. Combating Future Digital Money and a Brief Timeline of Money.

EWR is not in the gold business and does not hold a big pile of gold to sell. But as students of history and students of economics, we want to give you a brief timeline of money.

- » **We're also looking for solutions to the central bank digital currency threat that was already discussed.**

Ancient Money – Gold and Silver

Yes, there were shells, there were beads, there was paper money. But the longest used form of money throughout the history of the world has been gold and silver. It's from Bible times and before that to as recently as 50 years ago here in the United States.

Page 6

To Succeed We Must Learn from the Past.

- » Gold has been used as money for thousands of years.
- » Nathan Lewis recently wrote in Forbes, “the use of gold and silver in a monetary role goes back before Plato” (approx. 428-348 BC).
- » Gold goes back even before the invention of writing.
- » Although shell rings and wheat served as early Sumerian currency from about 3500 B.C., by 2700 B.C., silver had become the primary monetary standard of Sumer, with gold alongside in a supporting role.
- » The primary producer of gold in the ancient period was Egypt, and gold was the preferred high-quality value money.
 - As early as 2700 B.C., Egypt produced a standardized ring of money out of gold, stamped with an indication of weight. The history of money since that time is basically one long tail of gold and silver leading up to the classical gold standard of the pre-1914 era.
- » The Bretton Woods gold standard began in 1944 and ended in 1971.
- » Gold and silver coinage was the norm in India from the 6th century B.C.
- » Gold was the primary high-value money of the Han Dynasty, 202 B.C. in China.

Silver and Gold were Money in the Bible.

The Bible talks about gold and silver as money in both the Old and New Testaments.

- » Remember, the beggar wanted money from apostles Peter and John as recorded in Acts 3, and Peter answered the request, the demand for money by saying “Silver and gold I do not have, but what I do have I give you: In the name of Jesus Christ of Nazareth, rise up and walk.” (Acts 3:6 NKJV)
- » In the first chapter of the Old Testament book of Zephaniah, the Prophet warns people not to count on their money – “neither their silver nor their gold will be able to save them on the day of the Lord’s wrath.” [Basically, money can’t buy you out of trouble with God. But money is silver and gold.]
- » The point is silver and gold were money in biblical times.

Nothing sparks a debate in financial circles like the subject of gold.

As seen in chapter five of *Game Plan: How to Protect Yourself from the Coming Cyber-Economic Attack*:

- » John Maynard Keynes thought gold was a barbarous relic.
- » Fed Chairman Bernanke, predictably enough, said that he doesn't think gold is money, and people think of it that way only because of tradition.
- » Milton Friedman said gold could be money, of course, because money is what money does, meaning if it's used for currency, it is currency.
- » Warren Buffett doesn't like gold. He said, "Gold gets dug out of the ground in Africa or someplace. Then we melt it down, dig another hole, bury it again, and pay people to stand around guarding it. It has no utility. Anyone watching from Mars would be scratching their head."

Anyone in the world of the past 6,000 years of human history understands that gold can be money – in fact it is.

- » Peter Schiff said "Gold is money, and money retains its value. Gold retains its value."
- » Former Fed Chairman Alan Greenspan talked about a gold standard. He said, "In the absence of the gold standard, there's no way to protect savings from confiscation through inflation. Deficit spending is simply a scheme for confiscation."

The rise in the value of gold.

- » In 1263, gold traded at approximately \$4.10 an ounce.
- » It rose steadily in price to \$20.40 an ounce by 1696.
- » During the American Civil War, the price of gold jumped to \$45.40 per ounce.
- » Then it returned to its stable pre-war value of \$20.
- » It remained at \$20 an ounce until 1932.
- » **Gold has risen to as high as \$2,000 an ounce, and it's pretty close to that now.**

4. Don't be Fooled – Gold is Money!

The great author and economist George Gilder explains why gold is money in his book “The Scandal of Money”.

» Basically, Gilder proves that time is money. Essentially our labor is exchanged, our time for money, and we're paid by the hour or by the day or the week or the month.

» **Paper money doesn't reflect that. But gold does**, which has to be mined. It takes time to mine gold. (So does bitcoin, by the way. But that has its own other issues.)

“The great Achilles heel of the world economy today is the eclipse of money. Money has been turned from an instrument of knowledge, a measuring stick that gauges wealth, into an instrument of power of governments that tries to force economic growth by guaranteeing it.” —George Gilder

The reason capitalism succeeds is that it incorporates the scientific method in its process.

- » The growth of knowledge involves business plans that are not guaranteed and can go broke. That's very important to grasp.
- » Knowledge is wealth. It's measured in money, and money can be measured by time.
- » The act of discovery is mimicked with the act of mining.
- » Gold functions as money because you must discover it and mine it.

A printing press with unlimited ink and paper should not be money. Neither should ones and zeros on a computer screen with nothing behind them.

- » As Gilder explains, those are not instruments of wealth or knowledge; they become instruments of power used by governments.
- » That's the goal of central bank digital currency. A truly scary idea!

Advantages to Gold.

- » It has a limited supply.
- » It has privacy.
- » It has a long history of acceptance.

Pitfalls of Gold.

- » It's not easily divisible. You can't just scrape off a few flakes and buy a cup of coffee.
- » It can be confiscated by the government. In fact, it was confiscated by the US government in the 30s.
- » It's hard to carry.
- » It's expensive to store.
- » Central Bank Digital Currency seems so much more convenient than gold.

What if you could have the convenience without:

- » All the invasion of privacy?
- » All the government control?
- » All the manipulations?

Getting the best of both worlds:

- » The convenience of Central Bank Digital Currency.
- » Gold stability.
- » Without the downfalls of either and all the benefits of both.

5. Sounding the Alarm – We are in an Economic War!

For 15 years, Kevin has been sounding the alarm about economic warfare.

- » At first, no one knew what it meant, not even in our own Pentagon.
- » That was true in 2008 when a financial crisis nearly destroyed our country.
- » Most people don't remember that so much. They barely remember 09/11/2001.
- » But insiders get it now.
- » *Strategist* magazine in their year-end issue looked back on 2022 and called it "A Year of Economic Warfare."

We're facing an unprecedented period in which the economy and money is being used as a means of warfare.

- » That's true at the global and national levels.
- » It's also true at the personal level.

The Economic War Room is crafting strategies to help you address the threats we're facing.

- » We have a strategy to provide a means of protecting your wealth.
- » We're not selling it to you. We're not selling anything.
- » We found a provision in the Constitution that would allow Americans to protect wealth, to hold it in the form of historical money, and to use it as simply as using a debit card.
- » Your wealth would be protected from inflation, economic collapse, and unfair taxation.
- » Your wealth would have privacy benefits.
- » Best of all, it would operate seamlessly in a modern economy.

The founders understood the dangers of paper money and out-of-control spending.

- » They knew history.
- » They warned against inflation.
- » They had the inspiration to leave a small provision in the American Constitution with a big benefit.

The Big Debate.

- » Congress was given the power to coin money, Article I, Section 8.
- » They were also given the power to regulate the value of foreign money.
- » The Constitution says states can't print their own money, it'd be too confusing.
- » But Article I, Section 10, said that while no state shall coin money, it also said they can't make anything but gold and silver coin a tender in payment of debts.

The Key Word is Tender.

- » It's the same word found on our money. A dollar is "legal tender for all debts public and private."

- » What is tender? Investopedia gives us an answer: “Legal tender is anything recognized by law as a means to settle a public or private debt or meet a financial obligation, including tax payments, contracts and legal fines or damages. The national currency is [always] legal tender.”
- » According to the Constitution, a state could make gold and silver coins tender, a means to transact currency.
- » That’s the founders’ wisdom.

Universality.

- » Gold and silver are the same in Georgia or Maine or Alaska or China or Australia or Brazil.
- » It’s all measured by weight.

Gold and Silver were Used Pre-War.

- » The Bank of Kentucky, for example, took deposits of gold and silver and issued certificates based on Article I, Section 10.
- » That was a state-based tender, not regulated by Congress.
- » It was not taxed as a collectible.
 - NOTE: If you buy gold and silver yourself and hold it yourself, that’s taxable as a collectible.
- » Every time you do a transaction, there’s a capital gain or loss you’re supposed to report.
- » Foreign tender is taxable. It’s monitored, and yes, the US can regulate it.
- » But the certificates used in Kentucky and other states were tender.
- » That solved the divisibility problem. You could deposit an ounce of gold and get a certificate for 1/10 an ounce and so forth.

State-based Gold and Silver Tender were abandoned because the federal government was seen as more reliable and federal money was backed by gold.

- » State-based Tender was abandoned with the Civil War.
- » In the 1930s, FDR confiscated all the privately held gold and put it in Fort Knox.
- » As recently as the 1970s, we had gold backing our currency but Nixon abandoned that.

6. Golden Opportunity - The Most Important Economic Moment of Our Lifetime.

What if you took modern technology – everything's electronic: Bitcoin, CBDC, your debit card – and used that same concept as the Bank of Kentucky with that modern electronic twist. What if you could have a debit card using gold?

You know, that's being done right now?

There's a company called Glint, that's one example. But also, GoVer, DigiGold, and Vera Cash. It solves a big problem. It makes gold convenient. But it creates two new problems.

- » The first problem – Glint's gold is stored in Switzerland, and that means international banking laws and US oversight and regulation.
- » The second problem is every time you use your Glint card, it's reportable to the IRS and taxable.
 - So, every transaction can be monitored and it's still subject to confiscation.
- » Glint is a great idea to modernize gold, but it doesn't solve the other problem.

Transactional Gold.

Combine the Glint card with Article 1, Section 10 (the Bank of Kentucky idea) and you have what we call transactional gold – a debit card with full electronic features like Apple Pay or Samsung Pay issued by a state.

Texas Bullion Depository.

- » Page 223 of Kevin's book *Game Plan*, describes a solution – the Texas Bullion Depository.
- » Plans are to expand it by adding a debit card idea, just another way to pay such as Glint, or American Express, or PayPal.
- » This could be a life raft if the economic ship starts to go down.
- » It could be the start of a new and sound monetary system, allowing for a brighter future.
- » It could be a form of economic justice.
 - Rich people can buy hedges against inflation, but the average person just has the money in their bank account.
 - How about having that measured in gold to protect you?

- » We've talked about it in episodes 184 and 192. You can go back and watch those to get the details.
- » It can be called Transactional Gold or Constitutional Currency or Digital Texan. It doesn't matter what we call it so much as making sure it gets done.

Is this Bitcoin or a cryptocurrency?

- » No, it doesn't have to be.
- » It could be just as simple as a debit card. That's what we should start with, a 100% gold backed debit card.
- » You're paying for things with gold. And the merchant, they don't know they're getting gold. They're getting US dollars as it automatically exchanges.

Is there enough gold in the system?

- » Yes. More than you know – metric tons.
- » People call the Economic War Room all the time saying they've got gold ready to go into the system.
- » **Remember – we're not suggesting that people stop using the US dollar. We're just giving them an alternative.**
- » You can also use silver. It's in the Constitution.

Is it legal?

- » Article I, Section 10, the Supreme Court case called Briscoe versus Bank of Kentucky. Yes, they said it's legal!
- » What Kentucky did was legal.
- » What EWR is suggesting today should be legal too.

Can the gold be confiscated?

- » No. The federal government does not have the power to take gold from a sovereign state.

Would a state do this?

- » Texas has a depository.
- » Does the state have the will to do it? We hope so. We're pushing them to do it.

People across the country want transactional gold, the founders' secret to protect our economy.

⚠ ATTENTION: You can help us make this happen!

With the threat of central bank digital currency, inflation, and collapse, a lot of people want to help.

- 1. Sign our petition at www.economicwarroom.com/money.**
- 2. Share this Economic Battle Plan™ with friends and family.**
- 3. Contact your state legislator and tell them you want this in your state.**
 - » Or tell us to tell them. We'll be happy to talk to them.
- 4. Spread the word.**
 - » Have people watch and sign up to get on our list.

This is the most important economic moment of our lifetime. It's not a time to sit around and worry. **It's time to take action!** That's why the Economic War Room exists.

- » Watching takes just 30 minutes a week and we produce solutions.
- » But we need your help. We're making progress.
- » There is legislation proposed for Texas and we expect it in this session.
- » There are movement efforts in other states underway.
- » This can happen. We've talked to people in South Dakota, in Alaska, in Oklahoma, in Florida.

WHY SHOULD YOU CARE?

- » Because of President Biden's alarming Executive Order Liberty is at risk!
- » There is a plot to take control of the global monetary system using Central Bank Digital Currencies.
- » We are threatened by digital dollars.
- » We can combat the future of digital money.
- » Because gold is money.
- » America is facing an unprecedented time in its economy.
- » Right now, we have a golden opportunity - the most important economic moment of our lifetime.

ACTION STEPS

1. Sign our petition at www.economicwarroom.com/money.
2. Contact your state legislator and tell them you want this in your state.
 - a. Or help put us in touch with them. We'll be happy to talk to them.
3. Spread the word.
 - a. Share this Economic Battle Plan™, also have people watch this show and sign up to get on our list for updates through our weekly Economic Battle Plans™.
 - b. Also, be sure to get them to take action!
4. Pray that God will show you how to get your money right with Him, so you can make a difference in America.
5. Expect God to answer your prayers and thank Him for doing so.
6. Join us weekly in the Economic War Room. We are building new solutions with thought leaders that come through our doors every week.
7. Watch or listen to and study Economic War Room (<https://www.economicwarroom.com>) resources to help you understand the geopolitical landscape and threats against your money, your livelihood, and your way of life to better prepare you to enter the battle.
8. If you have a financial advisor, make sure they have your values and interests at heart. Make sure they really understand what ESG investments mean for our future. Suggest that they become part of the NSIC institute and nominate them to participate in our online certification (see below).

ATTENTION: Again, if you have not contacted your financial advisor, it is time to make it happen! If you don't have an advisor, it's time to consider getting one.

Page 16

IMPORTANT: If you have a financial advisor make sure they are aligning your investments with your values and that they understand the economic war being waged against you. (See more on Weaponizing your money below)

1. Financial Advisors sign up for the online NSIC class at Liberty University. If you are a financial advisor, go to www.NSIC.org and sign up for more information.
2. **Join us weekly in the Economic War Room®.** We are building new solutions with thought leaders that come through our doors every week. Understanding the geopolitical landscape and threats against your money, your livelihood, and your life will allow you to be better prepared as the Great Reset is waged against America. Be sure to sign up for our weekly updates at <https://www.economicwarroom.com>.
3. It is time to weaponize your money. **We are in an economic war, as you seek ways to Weaponize your Money in your Investments, Spending, and Giving, consider an NSIC-trained financial advisor.**

ATTENTION: Clients already with a Financial Advisor - Make sure your financial advisor has your values and interests at heart. Make certain they really understand what ESG investments mean for our future. Suggest that they become part of the NSIC institute and nominate them to participate in our online certification at <https://www.economicwarroom.com/advisor>

If you do not have a financial advisor, now is a good time to get one. We will soon publish NSIC advisors who have participated in the training and elected to become part of the NSIC Institute.

4. Weaponize your money toward principles that support Liberty, Security, and Values (LSV). You control your giving, spending, and investing. Nominate your financial advisor to attend our next class at Liberty University.
 - Investing. We suggest you get a like-minded financial advisor. We've done surveys and a clear majority of investors want an advisor who matches with their political and cultural beliefs. Unfortunately, Wall Street is pushing for you to just take what they offer in order to force a leftist agenda on you.
 - "If your advisor isn't willing to match your investments with your values, send them to us for training and education. If they won't do that, I can promise you that there are lots of other advisors looking for new clients." –Kevin Freeman

- If you are following Economic War Room®, you will be on the leading edge regarding global threats, geopolitical analysis, and how you can weaponize your money to strengthen America. Your money, livelihood, and way of life are at risk and these tools are designed to mobilize America to protect our economic liberty.

In the **Economic War Room®**, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve America’s problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The small ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.]

Make No Mistake: Programmable Digital Currencies Are Weaponizable Money

<https://www.zerohedge.com/economics/make-no-mistake-programmable-digital-currencies-are-weaponizable-money>

This is how the “stakeholder capitalism” that the WEF wants will work. You will only be allowed to use or buy from “approved” or “credible” businesses. Eventually even your bank account or credit cards won’t work with “unacceptable” businesses.
