

Background Briefing –How China’s Communist Party Made the World Sick!

COVID-19 has become the ultimate economic weapon. Just look at the unemployment rates, the trillions of dollars of spending, and the shutting down of nations around the world. COVID-19 has created one of the biggest economic disasters in the history of the world.

As we state, **what we see as the marketplace our enemies view as a battlespace™**, continues to play out clearly with COVID-19 and the economic war the Communist Chinese Party is now waging across the world. While the CCP virus may not have initially been intentional, China was purposeful in their decision to make sure they were not the only ones that felt the pain. They continue hiding information that could help the world solve this pandemic. **This is not the ideology one would expect from a so-called economic partner.**

Now, as we start to revive our economy there is talk of a second wave and even extended waves of COVID-19. While the verdict is still out on the long-term effects and trendlines, Economic War Room has conducted multiple live stream episodes on COVID and the steps we need to take to save our economy while protecting those in high-risk categories.

For your briefing this week, we invited Bill Gertz into the Economic War Room to share his investigative research on what we should know about COVID-19’s origins and China’s corruption of the World Health Organization.

“There was a 30-day period of time at the beginning of December through December 31st, 2019 that shook the world because the Chinese covered up, lied and deceived the world about the virus. They did this first to their own people and it was only through the efforts of some courageous Chinese doctors in Wuhan, China, who managed to circumvent this near totalitarian control on information within China. They were able to get word out first to the Chinese people and ultimately to the world that we’re facing a horrific global pandemic because of a virus. That virus most likely originated from one of two laboratories in Wuhan.” –Bill Gertz

Your Mission: To recognize that COVID-19 is more than a Pandemic, it is now a tool being leveraged by China as part of their strategy to ensure their Global Economic Dominance. Also, to understand that the WHO has now been corrupted by China's Communist Party.

"They (China) have an obsession with viruses, including these corona viruses, which come from bats. So for scientists in both the Chinese and inside US government to say that we don't have any evidence that this came from a laboratory is just nonsense. There's strong circumstantial evidence. Again, the Chinese have covered up and lied and deceived about it. And it's really important, I think, that the international community start to put pressure on China to tell what it knows about this disease." -Bill Gertz

Ep. 3-93 (OSINT) Open Sourced Intelligence Briefing. This includes quotes and summaries of conversations in the Economic War Room with Kevin Freeman featuring Bill Gertz. Bill is an investigative reporter that really knows and understands the Pentagon. He is the author of *China Threat*, *Deceiving the Sky* and his newest booklet, *How China's Communist Party Made the World Sick*. Bill Gertz is a friend of the military, intelligence agencies, and the Economic War Room. He was among the first to break the story of Kevin Freeman's research into Economic Warfare waged against the United States.

1. **Did the World Health Organization and China collude together?** – German Intelligence Community says YES.

"The World Health Organization issued a statement denying the German report. But I can tell you from my research and in my latest booklet that it's true the World Health Organization was totally corrupted by the People's Republic of China." -Bill Gertz

The Status of China and WHO communications in the beginning of the pandemic.
(From Bill Gertz)

- » Starting in 2003, China maneuvered and paid people to go infiltrate the World Health Organization so that it became a Chinese controlled organization.
- » The corruption of the World Health Organization can be seen in a January 12th statement by the WHO, that stated, "There was no human to human transmission of the virus." At that point, it had been almost a month and a half that Chinese researchers knew that this was a dangerous, easily spread virus between people.

- » **In addition, the World Health Organization following China's dictate, told the world not to curtail travel. 4 million people left Wuhan with many of them carrying the virus. They were sending infectious time bombs around the world.**

2. **China sent infected people around the world** - What we know China did and what we still have questions around.

China has established a disinformation campaign saying the US started this, but it is important to look at what they do vs. what they say.

- » China sent infected people around the world. At the same time, the Chinese government cut down all travel from Wuhan to Beijing. Note: They did not cut off travel to other parts of China or to the rest of the world.
- » Through Gertz's research, he is convinced this was done deliberately and that the **Chinese Communist Party leadership don't really care about the Chinese people. They're only concerned about advancing their own interests and power.**

“I think they made a calculation that China would not be the only one infected by this disease when they allowed travel from Wuhan around the world. I’m told reliably by U.S. officials that Wuhan was a center for Chinese international workers and many of them were coming home and going out of the country during that Lunar New Year period. Most of them went to Europe and then from Europe, they spread to the United States. The West Coast first case was in Washington state.” –Bill Gertz

» “Making it worse, China refused to provide virus samples. Now, the experts I talked to say that you really need to study to get the real understanding of the virus from the original samples.”

» If China cared and cooperated this could have been controlled.

“If they hadn’t lied to the World Health Organization, I think we could have stopped the virus very early in the outbreak.” –Bill Gertz

» China initially agreed in the Wuhan Institute of Virology to give samples to the U.S. and then reneged on it. So we never got original samples from China and we need those to really understand the origin of the virus.

What really happened?

“The short answer is we don’t know because China has refused to provide information. I believe the idea that it was naturally occurring and came from a wet market is a cover story to cover up some type of laboratory accident. Now, the scientists who have examined the genome say that it does not appear to have been manipulated in the laboratory. That said, there have been numerous studies, including by **a woman**

named Shi Zhengli, who is considered the bat woman of Wuhan.

In her study, she talked about **how China had taken a coronavirus and manipulated it so that it would more easily infect humans. This was done for research to try and find a vaccine. Furthermore, Doctor Shi said that, in fact, a**

pandemic would likely come from China in the future. And she was absolutely on target. **Now she's been completely silenced.**" –Bill Gertz

3. **China's Communist Party Made the World Sick and What We Should Do About It**

Bill Gertz provides his action plan for America.

- » **We need to have an international investigation** that is not corrupted by the World Health Organization or China. The last investigation that was done by both China and WHO concluded that we don't know the origin of the virus. China is claiming that it's a subject for scientists to study, but yet refuses to tell what they know or provide access for a proper investigation.
- » **We need to change our policy of engagement with China. It's clear that our supply lines were compromised** early on in March. The Chinese government knew the intense reliance of the US supply chain on pharmaceutical precursors as well as actual items.
- » **We need to be able to punish any U.S. company that's reliant on China for that supply chain and other critical supply chains.**

Rosemary Gibson confirmed in our previous briefing:
"Recently, China threatened to withhold medicines from the American people and that's a threat to kill us. We now having very credible reports that China is telling its companies not to send medicines to the US. This is a national security issue and finally Executive orders are being worked on to bring our pharmaceutical manufacturing back to the U.S."

- » **We need to cut off training for Chinese technicians and managers, the people that are running the Wuhan Institute of Virology and the Wuhan Centers for Disease Control were trained in the United States and in Europe.** And we need to stop that if they're going to be irresponsible in handling deadly pathogens.
- » **We need to change the way that China has been able to infiltrate international organizations like the World Health Organization.** We need to tell all the countries of the world that either China gets out, or we get out and we create a new international organization that's free from this nuclear armed communist dictatorship in Beijing.*

(*Note: Is it not strange that media and others rely so heavily on the WHO as the authoritative source and ignore the corruption or integrity of their previous reports?)

Supply Chain Critical Issue Example from BP-92

Two years ago, Rosemary Gibson described how dependent we are as a country (and as a world) on China for thousands of our medicines. This creates issues as it relates to supply chains but also medication safety and efficacy:

“There was a hearing at the U.S. China Economic and Security Review Commission last summer, and one of the commissioners spontaneously spoke up about his own experience with blood pressure medicines. There was a giant recall worldwide. One of the worst perpetrators was a company in China. The commissioner described getting rocket fuel compounds in his blood pressure medicines, where the active ingredient was made in China. Well, he said, if I’m getting it, then probably our active duty military are also getting it. Right now, the FDA is not in China. It’s not doing inspections. I think it’s going to be a very long time, if ever, that the FDA will get back in there and do what needs to be done to protect the American people given what China’s been doing around the world.”

Why you should care?

- There is still a lot of disinformation in play with China and the media is talking about a possible second wave and another shut down.
- Staying alert on factual information about COVID-19 is critical. We will provide updates as we learn more from Washington.
- The World Health Organization may no longer be a credible authority as it relates to COVID-19. They have consistently provided misinformation based on China’s influence over them.

In the Economic War Room®, we encourage Americans to be the “small ships that make the difference.” You cannot solely rely on the government or the president to solve America’s problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The small ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.]

Action Steps:

1. Being informed with genuine information is critical. Get Bill Gertz’s latest book, *How China’s Communist Party Made the World Sick*. It is available online in a digital version through [Amazon, Kindle](#), and digital ebook outlets. Also, check out his recent book, [Deceiving the Sky](#).
2. Understand and reinforce the importance of getting America’s economy going again while taking precautions to protect those most at risk for COVID-19.
3. Understand and share what the Chinese Communist Party really represents. They are not an economic partner as many in the media and Wall Street world want you to believe.
4. Review the action steps outlined by Bill Gertz and share with your Congressional representatives on why these are critical and ask them what they are doing about it?
 - » There needs to be an international investigation
 - » We need to change our policy of engagement with China. It’s clear that our supply lines were compromised
 - » We need to be able to punish any U.S. company that’s reliant on China for that supply chain and other critical supply chains.
 - » We need to cut off training for Chinese technicians and managers, the people that are running the Wuhan Institute of Virology. The Wuhan Centers for Disease Control were trained in the United States and in Europe. And we need to stop that if they’re going to be irresponsible in handling deadly pathogens we need to stop that.
 - » We need to get global support and change the way that China has been able to infiltrate international organizations like the World Health Organization.
