

China's Dangerous Attack on Our Telecommunications

China's strategists call it **Unrestricted**

Warfare – a doctrine that bypasses battlefields to strike the systems that keep America running. The targets are the backbone of daily life: undersea data cables, telecom networks vulnerable to SIM farms (server banks of SIM cards that can spoof identities and jam emergency lines), space assets at risk from anti-satellite weapons, and grid hardware susceptible to embedded “kill switches.” The aim is coordinated pressure to sow chaos—disrupt finance, sever communications, and darken the lights—without a formal declaration of war.

This Economic Battle Plan™ explains the doctrine, maps the most critical vulnerabilities in U.S. communications and power infrastructure, and translates them into clear actions to reduce dependence on adversarial suppliers, harden essential systems, and prepare practical contingencies—so you can protect your family, your wealth, and your country.

In this briefing we will discuss the following:

- » China's Unrestricted Warfare: A Coordinated Strategy Against U.S. Infrastructure
- » Vulnerabilities in U.S. Communication and Defense Systems
- » Electrical Grid & Economic Dependence: America's Achilles' Heel

YOUR MISSION: Equip yourself to recognize and counter China's multi-layered attacks on America's infrastructure, economy, and daily life—and take concrete steps to safeguard your family, capital, and operational resilience.

WHY YOU SHOULD CARE

- » **National Stability:** Coordinated “unrestricted warfare” tactics can paralyze financial systems and trigger unrest, undermining the environment that supports prosperity.
- » **Personal Impact:** The services you rely on—911 services, payment systems, internet, fuel, and groceries—can be disrupted in hours during a targeted campaign.
- » **Financial Security:** Understanding these risks lets you reposition portfolios and liquidity to protect savings and retirement from sudden shocks.
- » **Preparedness:** Knowing the vulnerabilities helps you plan for power outages, communications blackouts, and supply interruptions—reducing household risk.
- » **Strategic Advantage:** Acting early—advocating smart policy, prioritizing domestic resilience, and building contingencies—beats reacting after a crisis hits.

Ep. 10-367 (OSINT) Open-Sourced Intelligence Report. This briefing includes a conversation between Kevin Freeman and Charles “Sam” Faddis. Sam is a friend of the Economic War Room® and an American Patriot.

Sam Faddis is a former U.S. Army officer, trial attorney, and career undercover CIA operations officer who spent decades investigating America's adversaries and shaping strategies to protect national security. He is the Senior Editor of And Magazine on Substack, a widely respected national security commentator, and a fellow with the Committee on the Present Danger: China. Drawing on his extensive experience in intelligence and defense, Faddis provides expert insight into how hostile nations conduct covert operations and what the United States must do to counter these threats.

1. China's Unrestricted Warfare: A Coordinated Strategy Against U.S. Infrastructure

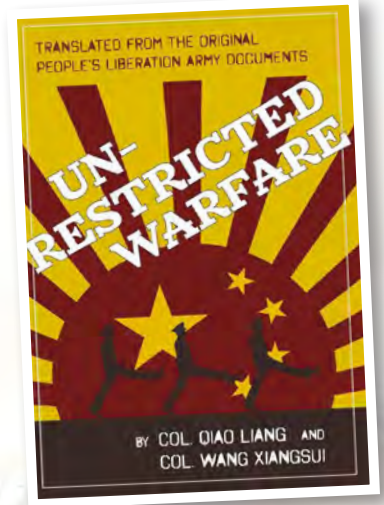

Unrestricted Warfare—articulated by two People's Liberation Army colonels in 1999—redefines conflict beyond conventional battlefields.

Instead of tanks and airstrikes, it blends economic sabotage, cyber intrusions, information ops, and attacks on critical infrastructure to cripple a superpower without a formal declaration of war.

The objective is systemic paralysis: freeze financial transactions, disrupt electricity and traffic control, and fracture communications to induce social panic and political upheaval.

“If the attacking side musters large amounts of capital to launch a sneak attack against financial markets, then after causing a financial crisis, buries a computer virus and hacker detachment while carrying out a network attack against the enemy so that the civilian electricity network, the traffic dispatching network, the financial transaction network are all paralyzed... this will cause the enemy nation to fall into social panic, street riots, and a political crisis.”

—PLA Cols. Qiao Liang & Wang Xiangsui,
Unrestricted Warfare (1999)

This is hybrid warfare taken to its logical extreme—weaponizing global interdependencies and commercial technologies to strike invisible choke points.

After decades of investment in capabilities that range from subsea cable-cutting platforms to anti-satellite systems (and complementary low-cost tools like SIM farms), the doctrine is not hypothetical; it is operational.

Its power lies in simultaneity: coordinated pressure across finance, communications, and energy can erode deterrence, delay attribution, and achieve strategic effects before traditional defenses can respond.

Attention: Unrestricted Warfare turns supply chains and networked infrastructure into battlefields, demanding urgent reassessment of dependencies and rapid hardening of critical systems.

2. Vulnerabilities in U.S. Communication and Defense Systems

America's communications backbone is world-class—and dangerously brittle.

A coordinated adversary can degrade multiple layers at once, severing the lifelines that support finance, defense, and daily life.

Undersea cables

Roughly 99% of global data—banking, business, military traffic, and personal communications—moves through submarine fiber linking continents.

These cables already suffer accidental breaks; now, Chinese vessels equipped with deep-water remotely operated vehicles (ROVs) can deliberately cut them, including at depths greater than a mile.

Even a handful of severed routes could isolate U.S. markets and communications overnight.

“99% of the data... on the planet moves by cable and it moves... by undersea cables between continents. So that means basically your entire modern existence... is dependent upon data that’s moving on those cables. And those things are incredibly vulnerable.”

—Sam Faddis

SIM farms

Covert server racks loaded with thousands of subscriber identity modules (SIMs) can spoof identities, flood 911, and overwhelm cellular networks—functioning like rogue telecom hubs for disruption and fraud.

One such operation was exposed near the United Nations during heightened security; given their low cost and concealability, many more may be active and undetected.

Anti-satellite (ASAT) capabilities

China has invested in satellite-killer systems (e.g., HQ-29-class interceptors) that can disable or destroy space assets.

Because GPS underpins U.S. precision weapons, logistics, timing for financial transactions, and everyday navigation, space degradation would erode both military advantage and civilian functionality in hours.

“HQ-29—China’s new satellite-killer missiles—threaten to end U.S. space dominance and cripple the American military.” –Kevin Freeman

The combined effect

These attack surfaces enable simultaneity: cut a few cables, jam urban cellular grids via SIM farms, and blind GPS-dependent systems from orbit.

The result is cascading disruption—markets halted, command-and-control degraded, first responders unreachable—pushing society toward a pre-digital state before attribution or response can catch up.

Attention: Weaknesses across subsea cables, telecom networks, and satellites can be exploited in concert, severing America’s communication lifelines and eroding deterrence in a single stroke.

3. Electrical Grid & Economic Dependence: America’s Achilles’ Heel

America’s most consequential vulnerabilities converge where power meets procurement.

A hostile actor that can darken the grid and delay replacement parts can turn a short-term shock into a long-term crisis.

The combination of technical exposure (grid components at risk) and strategic exposure (economic dependence on adversarial supply chains) creates conditions for cascading failure across banking, logistics, healthcare, and public safety.

Electrical grid infiltration

Large power transformers—the irreplaceable backbone of electricity distribution—are scarce, slow to manufacture, and many are sourced from China.

Intelligence professionals warn that malicious functionality (“kill switches”) could be embedded in critical hardware, enabling remote shutdown or sabotage.

A successful attack would halt fuel pumping, spoil food, disable payments and banking, and sever communications—triggering unrest within hours, not days.

“The Chinese also... have developed the capacity to take down our entire electrical grid... putting kill switches into all the giant transformers in our grid... [enabling them] to switch off the lights, prevent you from pumping gas effectively wink all of your money that exists electronically at a bank out of existence” —Sam Faddis

Grid fragility is magnified by lead times: replacing a single high-voltage transformer can take many months under the best conditions.

If resupply depends on overseas factories during a geopolitical crisis, restoration timelines stretch further—prolonging blackouts and compounding economic damage.

Economic dependence & supply chains

Beyond energy hardware, U.S. reliance on Chinese manufacturing for pharmaceuticals, electronics, and critical infrastructure means American dollars help underwrite the very capabilities arrayed against us.

This is the modern equivalent of financing an adversary's arsenal—an avoidable weakness that turns routine procurement into a national-security liability.

“These are the companies that are submarine companies that lay these cables. I didn't see an American company on the list. That's a problem. We've got to fix that. We need to have American capabilities across the board.” —Kevin Freeman

Reducing exposure is not merely patriotic; it is pragmatic risk management.

Decoupling in sensitive sectors, reshoring key production, qualifying multiple non-adversarial suppliers, and guiding capital toward resilient domestic industries are the practical steps that convert vulnerability into strength.

Attention: Economic entanglements embed sabotage risk in the grid and slow recovery after an attack—inviting prolonged blackouts and financial shock unless decisive independence is pursued.

Start Weaponizing Your Money Today with Patriot Mobile. They make weaponizing your spending easy!

- » Patriot Mobile is for Economic War Room® Patriots! Patriot Mobile is the ONLY Conservative wireless provider.
- » They use a portion of the profits they make to fund causes that align with freedom and liberty and not the progressive leftist agenda! Other carriers support left-wing causes you would never support.
- » Patriot Mobile uses the SAME cell towers that all the other carriers use, so your service quality will be the same.
- » They have a variety of packages, so one will fit your budget and you will be supporting Liberty, Security, and Values.
- » GO to PatriotMobile.com/ewr | Use Promo Code EWR to get ONE MONTH FREE!

ACTION STEPS:

1. **Follow Sam Faddis on X** [@RealSamFaddis](#) to keep up with his updates on national security threats.
2. **Visit [NSIC.org](#)** to connect with a financial advisor who can help you prepare for and navigate unrestricted warfare.
3. **Reassess Your Investments:** Review whether your portfolio includes exposure to Chinese companies or industries tied to adversarial governments. Redirect capital toward secure, domestic industries.
4. **Prepare for Disruptions:** Consider how you and your family would function during a prolonged power outage or communication blackout. Stockpile essentials such as water, food, and backup power sources.
5. **Stay Informed:** Follow trusted sources like the [Committee on the Present Danger](#): China and NSIC updates to remain aware of emerging threats.
6. **Support American Manufacturing:** Prioritize products and companies that build critical infrastructure domestically, especially in energy, medicine, and technology.
7. **Engage Policymakers:** Contact representatives to demand policies that reduce dependence on Chinese manufacturing and strengthen U.S. defenses against infrastructure attacks.

ONGOING ACTION STEPS:

1. **Get the book [Pirate Money](#)** to learn about the transactional gold and silver movement sweeping America. Legislation has now passed in Florida, Texas, Arkansas, Louisiana, and Missouri! This is the answer to inflation and the looming threat of CBDC.
2. **Get a copy of [According to Plan](#)** to better understand these domestic attacks on our Liberty as well as the overall Marxist plan to consume America.
3. Seek opportunities to inspire other Americans to stand up for what is right.
4. Send them this Economic Battle Plan™ and ask them what they are doing to stand for America and Liberty!

- » Elect Politicians that understand the need to preserve American Liberty.
- » Encourage and ask your elected officials to educate themselves.
- » Ask them how they are working to strengthen our education system and reverse the push for Marxist indoctrination. These are big issues, if your representatives are not aware and working toward solutions directly or indirectly based on their committees, hold them accountable!

Your support for Transactional Gold and Silver Currency is critical! We have legislation advancing in 20+ states! Learn about progress in your state at <https://transactionalgold.com/> and click the "Active States" button in the upper right-hand corner.

5. **Check your investments to see if they are helping fund the agendas of Globalist Elites. If you have a financial advisor insist that they give you an update and encourage them to become part of the NSIC.**

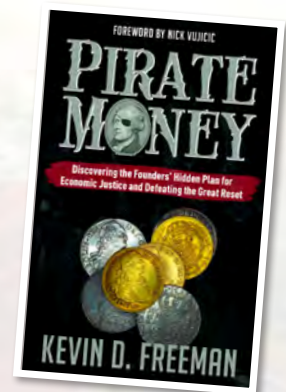

Seek out investment opportunities in patriotic innovations.

Financial Advisors can learn more at www.NSIC.org. Weaponize your money, your investing, spending, and giving!

ATTENTION: Clients already with a Financial Advisor - Make sure your financial advisor has your values and interests at heart. Make certain they really understand what ESG investments mean for our future. Suggest that they become part of the NSIC institute and nominate them to participate in our online certification at economicwarroom.com/advisor.

6. Be certain to buy Kevin's new book, *Pirate Money: Discovering the Founders' Hidden Plan for Economic Justice and Defeating the Great Reset*. Learn more at www.PirateMoneyBook.com.

In the **Economic War Room®**, we encourage Americans to be the “little ships that make the difference.” You cannot solely rely on the government or the president to solve America’s problems. You have to make a difference. It is up to you to help take our country back and create a voice for economic liberty. [The little ships are based on Churchill’s Operation Dynamo that rescued the British Expeditionary Forces in the Miracle of Dunkirk.]
