

America's Four Horsemen of the Apocalypse and Our Six Trials by Fire

America stands at a defining crossroads. As the nation approaches its 250th anniversary, history, economics, faith, and national security are colliding in ways that mirror ancient warnings—yet none of these threats are inevitable disasters. They remain preventable. Drawing modern parallels to the Four Horsemen of Revelation, America now faces six “trials by fire”: exploding debt, currency decline, programmable money, inflation-driven socialism, demographic collapse, and immigration without assimilation.

This is not a moment for apathy or fatalism. These challenges are choices. Like the watchmen of old, prudent citizens must recognize the danger, prepare, and act. With a narrow political window and intensifying geopolitical pressure, Americans still have the opportunity to restore liberty, prosperity, and national sovereignty through constitutional, biblical, and market-driven solutions. The future depends on whether we confront these trials—or ignore them until it is too late.

In this briefing we will discuss the following:

- » America Faces Six Trials by Fire—Any One of which Could Trigger National Collapse
- » Economic Crisis: Debt Explosion, Dollar Threats, Inflation, and CBDCs
- » The Social Collapse: Demographic Decline Plus Immigration Without Assimilation
- » SCAN Solutions: A Blueprint for National Renewal

YOUR MISSION: Equip yourself with the knowledge and tools to understand the threats facing America—and take practical action to protect your family, your finances, and the future of the nation.

WHY YOU SHOULD CARE

- » Each of these threats is real, measurable, and already unfolding—and ignoring them could cost Americans their nation and way of life within a single generation.
- » Rising debt, inflation, and currency manipulation are directly eroding your savings, purchasing power, retirement security, and ability to provide for your family.
- » Understanding digital control systems, inflation mechanics, and currency risks gives you the tools to protect assets before a crisis—not during it.
- » Demographic decline and cultural fragmentation will reshape your neighborhood, schools, economy, and freedoms over the next decade if nothing changes.
- » Proactive solutions—sound money, strategic investing, patriotic assimilation, and family resilience—can restore hope, shrink wealth gaps, and secure prosperity for future generations.

Ep. 10-370 (OSINT) Open-Sourced Intelligence Report. This briefing includes a conversation between Kevin Freeman and Mike Carter. Mike is a producer of the Economic War Room® and an American Patriot.

Mike Carter, co-host of Pirate Money Radio, is a Co-Founder of the NSIC Institute, a producer of the Economic War Room, and the Economic War Room patriot leading state efforts considering transactional gold and silver.

Pirate Money Radio aims to inform and provide economic solutions to listeners, emphasizing the importance of being faithful with money, which includes giving, spending, and investing based on liberty, security, and values (LSV). Each week, Kevin Freeman discusses various economic challenges and aims to help people prepare and protect themselves from potential cyber-attacks, inflation, and other financial crises, offering real-world solutions.

1. America Faces Six Trials by Fire—Any One of Which Could Trigger National Collapse

America is not confronting a single crisis—it is confronting **six at the same time.**

These threats are economic, geopolitical, cultural, and spiritual. They are not random, not mysterious, and not inevitable. They are measurable, explainable, and preventable.

To understand them, we can draw on the biblical framework of the **Four Horsemen of Revelation**, reimagined as four active forces capable of dismantling a nation without a single shot being fired.

The Four Horsemen of the American Apocalypse

Red—Communist China

A conquest-driven adversary stealing American technology, dominating supply chains, infiltrating institutions, and weaponizing economic leverage to overtake U.S. power.

Green—Radical Islamists

Ideologies seeking to replace Western civilization with Sharia-based governance through demographic expansion, propaganda, and terror.

Blue—Globalists and Transnational Institutions

The United Nations, World Economic Forum, and World Health Organization are working to centralize authority and erode national sovereignty—symbolized by the “blue helmets.”

Black (maybe it should be Yellow)—Our Own Greedy and Apathetic Hearts

The most dangerous of all: internal corruption, complacency, outsourcing prosperity for profit, and citizens who wait passively for someone else to fix the nation.

“The worst of all of them may be the blackness of our own heart that’s either apathetic or it’s lazy, or it’s traitorous or it’s greedy. Maybe we should call this yellow to demonstrate cowardice.” —Kevin Freeman

This framework is not meant to provoke despair—it is meant to provoke vigilance. Proverbs 22:3 warns that “A prudent man sees danger ahead and prepares for it. A fool goes blindly on and suffers the consequences.”

These Four Horsemen set the stage for the Six Trials by Fire that follow—each powerful enough to end the nation if ignored.

Attention: America's enemies are already in motion; only an awakened and engaged citizenry can counter the Four Horsemen before the trials consume the nation.

2. Economic Crisis: Debt Explosion, Dollar Threats, Inflation, and CBDCs

The first four Trials by Fire are not theoretical—they are already unfolding in America's economy.

Financial systems that once seemed stable are now showing signs of structural failure, including runaway debt, collapsing currency confidence, digital financial control, and inflation that undermines the American Dream.

Together, they create a perfect storm capable of triggering national insolvency and cultural breakdown.

Trial 1: The Debt Bomb

The United States now holds more than \$38 trillion in national debt, adding \$1 trillion (from \$37 trillion) in just 71 days.

Interest payments alone have reached \$1 trillion per year, and if the current path continues, every federal tax dollar will go toward interest within 16 years—leaving nothing for defense, infrastructure, Social Security, or basic government operations.

“In 16 years, if we stay on the current trajectory, all tax revenue from every American added up together won't even pay the interest on the national debt.” —Kevin Freeman

Debt on this scale functions like a financial IED: silent, hidden, and designed to detonate without warning.

The more America borrows, the more the dollar weakens, foreign creditors gain leverage, and the entire economy becomes a hostage to interest payments.

Attention: Unsustainable debt is the detonator that can ignite every other trial—demanding immediate fiscal discipline and sound-money reform.

Trial 2: Currency Takedown and the BRICS Challenge

While America prints and borrows, rival nations prepare to dethrone the U.S. dollar.

BRICS—Brazil, Russia, India, China, and South Africa—have spent two decades building an alternative financial system to challenge dollar dominance.

Analysts as early as 2008 warned that mass immigration, economic decline, and moral degradation could fracture the United States and accelerate a dollar collapse—conditions we now see materializing.

“Vladimir Putin hated the privilege the dollar had and intended to create a BRICS alliance that would take down the dollar.” –Kevin Freeman

If the dollar loses reserve-currency status, the consequences are immediate: imports spike, Treasury markets crash, and global finance shatters into competing blocs.

America’s economic power—built on trust in the dollar—would vanish.

Attention: The dollar’s fall is not inevitable—transactional gold and silver give Americans a personal hedge that preserves wealth and economic freedom.

Trial 3: Programmable Money and Central Bank Digital Currencies (CBDCs)

A CBDC is a government-issued digital currency—programmable money that can be tracked, controlled, or denied by a central authority.

Unlike physical cash, a CBDC can limit where you spend, what you buy, and whether you can buy at all.

Balances can expire, accounts can be frozen, and transactions can be approved or rejected based on government criteria.

“Without the mark of the beast, you won’t be able to buy and sell... CBDC might be the source code.” –Mike Carter

Already, 134 countries representing 98% of global GDP are developing or piloting CBDCs. Even private “stablecoins” can be engineered with similar controls.

Attention: CBDCs threaten financial privacy and free exchange; protecting liberty requires banning digital control currencies and defending cash and private alternatives.

Trial 4: Inflation and the Rise of Socialism

Since 1971, the dollar has lost more than 90% of its purchasing power. This is not accidental—it is the result of money-printing and engineered inflation.

The Cantillon Effect shows that newly created money flows first to the political and financial elite, who grow wealthier while ordinary Americans fall behind.

“The top one-tenth of 1% has increased their wealth at the same pace as the money supply has grown. But the bottom 50%... has lost ground.” –Kevin Freeman

Wages lag. Home ownership becomes impossible. Savings shrink. Young adults lose faith in capitalism—not because they reject freedom, but because they can no longer access prosperity through honest work.

Attention: Honest money—gold-backed transactional currency—can shrink the wealth gap without punishing productivity or raising taxes.

Together, these four economic trials form the backbone of America's unraveling. But the crisis does not end with dollars and debt. The next trial strikes at the heart of the nation's future: family formation, birthrates, and national identity.

3. The Social Collapse: Demographic Decline + Immigration Without Assimilation

Economics is reshaping American culture—and culture is reshaping America's future. The fifth and sixth Trials by Fire strike at the foundations of national stability: family, birthrates, identity, and social cohesion.

A nation can survive war, recession, and political strife, but no nation survives the collapse of its people or culture.

Trial 5: Demographic Destiny

For the first time in American history, young adults are choosing survival over family. The median marriage age has climbed from an average of 20–23 to an average of 28–30, and birth rates have fallen below replacement.

Double Income No Kids (DINK) has become an economic necessity, not a lifestyle preference.

Families cannot afford homes, children, or single-earner households. As a result, the domestic population is shrinking, the future workforce is evaporating, and entitlement systems are headed toward crisis.

“1971 is when everything changed when we left the gold standard with fair weights and measures.” —Kevin Freeman

When birthrates decline, nations collapse mathematically: fewer workers, more dependents, higher taxes, weaker military, and a diminishing national identity.

Europe is the warning—entire cities transformed demographically within one generation.

! Attention: Transactional gold lowers living costs and restores the economic foundation for earlier marriage, larger families, and demographic renewal.

Trial 6: Immigration Without Assimilation

Immigration can strengthen a nation when newcomers adopt its values, language, and civic culture.

But America's open borders—combined with welfare incentives and corporate demand for cheap labor—produced mass inflows without integration.

Millions enter or are transported into the interior, housed in hotels or shelters, and maintained on taxpayer dollars, with no incentive to join the American civic identity.

“Immigration without assimilation is invasion.” –Kevin Freeman

Instead of becoming American, many arrivals form ethnic enclaves, preserving foreign loyalties, languages, and identities. A shared national culture fragments into competing groups—while citizens pay the cost.

A shrinking native population combined with a growing unassimilated population does not produce renewal—it produces instability. Europe already shows the outcome: cultural displacement, political unrest, and demographic replacement.

! Attention: America must secure the border and pair immigration with policies that reward assimilation, restore cultural unity, and align newcomers with the American Dream—not subsidize permanent dependency.

4. SCAN Solutions: A Blueprint for National Renewal

America does not have to fall. The Six Trials by Fire are real, but each one is solvable—if citizens reject apathy and take action.

The **Saving Civilization Action Network (SCAN)** is a nationwide coalition launching at AmFest in Phoenix this December, bringing together patriots, policymakers, and faith leaders to confront these threats with constitutional, biblical, and market-driven solutions.

SCAN is not commentary—it is the organized force standing against the Four Horsemen and advancing national renewal.

“We’re going to have to wake people up, and they’re going to have to get active and involved politically, and then they’re going to have to make the right decisions for their family.” —Kevin Freeman

In addition to SCAN, there is a core principle: **restore honest weights and measures**. Scripture declares, “*A false balance is an abomination*” (Proverbs 11:1), and the Constitution requires lawful money (Article I, Section 10).

Transactional gold and silver—recognized as legal tender at the state level—give families a way to bypass fiat inflation, shrink the Cantillon wealth gap, and starve the debt bomb of endless borrowing.
