

The Four Horseman of the American Apocalypse **The Green Horseman: Sharia Supremacism**

Western civilization rests on Biblical foundations that affirm individual dignity, equal justice under law, freedom of conscience, and the separation of spiritual and temporal power. These principles produced constitutional governance, human rights, and prosperous open-market societies. Today, they face pressure from declining religious engagement, cultural fragmentation, and rising ideologies that propose alternative models of law, order, and authority.

Among these challenges, the resurgence of Sharia supremacism, the green horseman, poses a serious threat. It combines religious doctrine, demographic trends, institutional expansion, and strategic alliances to promote submission over liberty, gradually eroding equality, free speech, and the rule of law.

This Economic Battle Plan™ analyzes the civilizational and governance risks of Islamic institutional growth in the West. It examines theological and historical incompatibilities with Biblical values; draws cautionary lessons from Europe and the UK, where integration failures and parallel structures have created visible strains; and identifies early warning signs in the United States, including stealth jihad tactics and red-green convergences. The focus is not on personal faith but on assessing compatibility with constitutional order, evaluating genuine risks, and providing steps to preserve national sovereignty, equal protection under law, and the freedoms that define American exceptionalism.

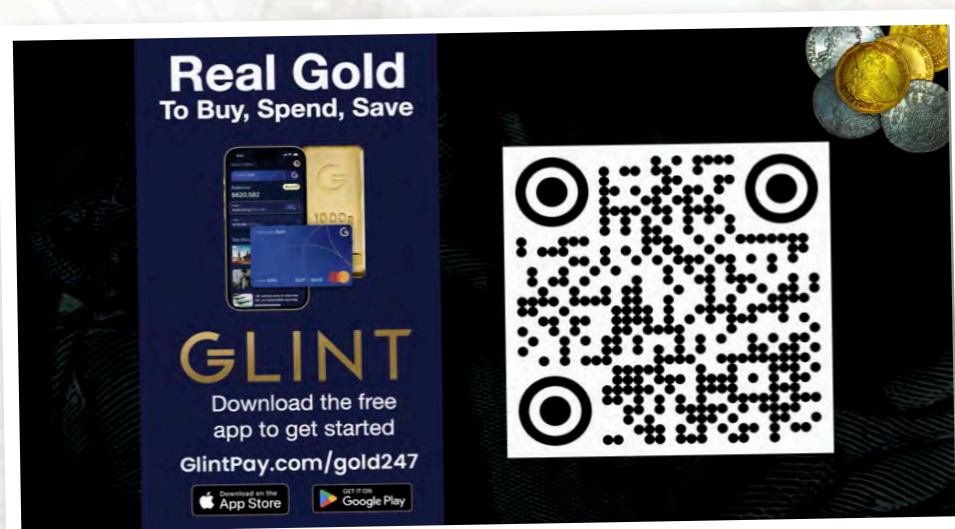

In this briefing we will discuss the following:

- » The True History of Islam and Its Incompatibility with Western Civilization
- » The Rise of Islam in Europe and the United Kingdom
- » Islam's Emerging Expansion in the United States

YOUR MISSION: Understand the Green Horseman threat, the reasons Sharia is incompatible with Western Civilization, and what can be done to prevent its spread and enforcement in the United States.

WHY YOU SHOULD CARE

- » Western legal and economic systems rest on shared principles of equality, individual rights, and moral accountability. Alternative governance models expanding in the same space create structural tensions that can destabilize the whole framework.
- » Shifts in family law, education, community standards, and public safety directly impact your neighborhood, schools, courts, workplaces, and personal security.
- » Europe's experiences with integration failures illustrate the creation of segregated enclaves that challenge national unity, offering a preview of potential disruptions to your neighborhood's safety, schools, and economic opportunities if similar patterns emerge in your community.
- » Women's rights, child safety, and civil liberties rely on Western Values and Constitutional law and would be nonexistent under Sharia.
- » The goal of Sharia is total submission to a system wholly antithetical to our Constitution and Liberty.
- » Discovered documents demonstrate the intention of Sharia to displace our way of life entirely through Civilization Jihad.
- » Informed action builds resilience against social fragmentation, helping preserve the stability, prosperity, and freedoms Americans value.

Ep. 10-382 (OSINT) Open-Sourced Intelligence Report. This briefing includes a conversation between Kevin Freeman and Peter McIlvenna. Peter is a friend of the Economic War Room® and a British Patriot.

Peter McIlvenna is a British researcher, public speaker, and free-speech advocate focused on the intersection of cultural identity, governance, and civil liberties in the Western world. He is the founder and host of Hearts of Oak, an international interview platform dedicated to open dialogue on political, cultural, and societal challenges facing democratic nations.

Peter previously served for over a decade as a senior researcher for Lord Pearson of Rannoch in the UK House of Lords, where he worked on issues related to national sovereignty, free expression, and religious liberty. He also held leadership roles within the UK Independence Party (UKIP), including serving as National Campaign Manager during the 2019 local and European elections.

Earlier in his career, Peter traveled extensively across the United Kingdom speaking in churches and civic forums on questions of faith, culture, and public discourse. His work consistently emphasizes the importance of free speech, institutional courage, and the preservation of foundational Western values in an era of rapid ideological change.

1. The True History of Islam and Its Incompatibility with Western Civilization

Islam emerged in the 7th century through the life of Muhammad (c. 570–632 AD), who claimed divine revelations from the angel Gabriel that established not merely a faith but a complete system of religion, law, economics, politics, and warfare.

This all-encompassing ideology stands in direct contrast to Christianity's spread, which relied on the apostles' peaceful persuasion, reasoned debate, and compassionate outreach—exemplified by Jesus engaging outcasts and debating religious leaders without coercion.

“Islam as an ideology, as a religion, it's spread by the sword. And if any of us were picking up our Bibles and reading how Jesus launched 80 military campaigns, we would be concerned.” – Peter McIlvenna

Historically, Islam expanded aggressively through Muhammad's documented military expeditions and the subsequent caliphates—unified empires where the caliph held both spiritual and temporal authority.

These conquests stretched from North Africa and the Arabian Peninsula to India and southern Europe (including Spain), often enforcing submission via forced conversions, the jizya tax on non-Muslims, or warfare against those who resisted.

The Quran, revealed in Arabic and arranged non-chronologically (requiring extensive scholarly commentaries, or tafsir, for clarity), contains nearly 100 “sword verses” endorsing force against unbelievers—sharply differing from the Bible’s chronological, narrative-driven structure that emphasizes redemption, grace, and voluntary faith.

“Muhammad... pushed this ideology not just in a religious way, not just in a belief system, but it was an economic model. It was a legal model. It was a military model.” –Peter McIlvenna

At its core, Islam means “submission” rather than the frequently claimed “peace.” This framework fundamentally clashes with the Biblical roots of Western civilization, which affirm human equality as beings made in God’s image, personal dignity, and salvation as a free gift through faith rather than ritual compliance.

Islam rejects essential Christian doctrines: it views the claim that Jesus is the Son of God as blasphemous (the Quran insists God begets no offspring), dismisses the Trinity as polytheistic, and denies the historical crucifixion and resurrection, asserting instead that Jesus ascended directly to heaven.

Muhammad is elevated as the final prophet, superseding biblical figures and establishing a paradigm that demands subordination of non-adherents—including discriminatory legal treatment of women under Sharia, derived from the Quran and Hadith (authenticated collections of Muhammad’s sayings and actions).

“Authoritative Islam is this. Apparently, an angel appeared to Muhammad and told him, ‘This is the way that people should live.’ The way people should live includes a lot of covering for women, and that they have a different place in society than men. They’re not equal to men, so they need to do all of these special things. You’ve got to obey all of these rules. Praying so many times a day. And by the way, you’re supposed to take this and take it to the next person you see and say, this is the way you’re going to live, because God commanded it. And then if they disagree with you, you are to conquer them. And if they completely, vehemently disagree with you, you’re to kill them.”

–Peter McIlvenna

For those familiar with comparative religion, these differences explain why Sharia—regulating everything from halal dietary rules to governance—struggles to integrate seamlessly with pluralistic, secular democracies built on biblical ideals of love, forgiveness, and voluntary belief.

As Western societies experience declining confidence in their own Biblical heritage, a cultural and spiritual vacuum forms—one that more assertive ideologies can readily fill, setting the stage for Islam to attempt to subjugate the American people and destroy democracy.

Attention: The conquest-oriented history and doctrinal rejections in Islam create an irreconcilable divide with Christianity's emphasis on peaceful persuasion, placing Western values of liberty and equality under sustained pressure—and foreshadowing the integration challenges now visible in Europe and emerging in the United States.

2. The Rise of Islam in Europe and the United Kingdom

Europe and the United Kingdom offer a stark, real-world example of what can happen when Western societies fail to defend their Biblical foundations and allow unchecked ideological expansion.

The rapid growth of Islamic influence began with post-World War II mass immigration, was accelerated by higher fertility rates within Muslim communities, and gained momentum in the widening cultural vacuum created by declining Christian participation in politics, media, and public life.

This combination has enabled assertive Islamic institutions to fill the void, establishing parallel structures that directly challenge national legal and social norms.

“We have capitulated completely in the UK and all across Europe.” —Peter McIlvenna

In the UK alone, approximately 85 Sharia councils operate as of 2026—informal advisory bodies that mediate family matters such as marriage, divorce, and inheritance.

While they lack formal legal authority, their rulings carry powerful communal weight and frequently apply Sharia principles that disadvantage women, granting them only half or a quarter the rights of men in testimony, inheritance, and custody.

This stands in direct contradiction to the Universal Declaration of Human Rights' commitment to equality. The 1990 Cairo Declaration on Human Rights in Islam, endorsed by many Muslim-majority nations, subordinates all human rights to Sharia, creating loopholes that permit practices like polygamy and unequal divorce while prioritizing religious edicts over universal standards.

“You have a parallel system with a parallel legal system, with a parallel religious system, with a parallel system in terms of how you treat women.” —Peter McIlvenna

These developments have produced profound societal harms, most notably the grooming gangs—organized networks, often of South Asian Muslim background, that systematically sexually exploited and trafficked vulnerable young girls, predominantly from white working-class families.

Certain interpretations of Quranic verses on “spoils of war” have been cited in justifying such abuse. Estimates suggest up to a million victims in the UK since the 1970s, with decades of institutional cover-ups driven by fears of racism accusations and political correctness.

A major independent national inquiry, announced in December 2025 and chaired by Baroness Anne Longfield, is set to begin in March 2026 and run for three years to investigate these systemic failures.

Integration failures have also created self-segregated enclaves and so-called “no-go” zones in urban peripheries—such as parts of Paris suburbs—where police presence is limited and local norms prevail.

Honor-based violence, including coercive control and honor killings to protect family reputation under perceived Islamic standards, further compounds the crisis.

Western openness has been exploited through booming mosque construction and halal markets that build parallel economic ecosystems, resisting assimilation and illustrating how a diminished Christian presence allows more dominant ideologies to take hold.

“We have had an awful situation of cover-up in the UK for over at least 51 years since 1975. ... the same thing happening in Sweden, the same thing happening in large parts of Paris, on the outskirts where you’ve got Muslim communities who have been brought in and they are not integrating at all.” –Peter McIlvenna

Europe’s experience demonstrates the high cost of cultural capitulation: isolated parallel societies, weakened legal frameworks, and persistent abuses that serve as a clear warning.

The patterns now emerging in the United States show that the same trajectory is possible here—unless decisive action is taken to defend constitutional order and national cohesion.

Attention: Islam is inherently incompatible with Western civilization, and immigrants in Europe have made it abundantly clear that they are uninterested in assimilation and intend only to establish their own kingdoms inside Western nations.

3. Islam’s Emerging Expansion in the United States

Here in the United States, we face the early stages of patterns that have already produced serious challenges in Europe: stealth jihad—a calculated, non-violent, gradual strategy to advance Sharia influence through demographic shifts, institutional expansion, and strategic alliances. (To be clear, the non-violence will only last until Sharia has enough of a foothold, as seen in the UK and much of Europe.)

While America still benefits from stronger constitutional confidence and clearer expectations of integration, warning signs are multiplying rapidly.

The Muslim population is estimated at approximately 4.45 million as of 2026, growing through higher birth rates and continued immigration.

In Texas alone, there are roughly 330 mosques in early 2026—including 48 new ones added in the previous 24 months—positioning the state to rival or surpass California’s lead of around 407 mosques.

“You have Sharia courts operating in the US. We’ve got 85 Sharia courts operating in the UK. You also have those operating because it’s supply and demand.” –Peter McIlvenna

Halal product demand is surging, with annual growth rates nearing 22% in major Texas cities like Dallas and Houston, illustrating “economic jihad” by embedding Islamic standards into everyday commerce.

Wahhabism—a strict, puritanical Sunni sect originating in Saudi Arabia—continues to spread through petrodollar funding tied to 1970s U.S.-Saudi oil agreements, supporting mosque construction and prison outreach where isolation often leads to conversions and radicalization.

“Learn from our failings in the UK and Europe. Please chart a different course.” –Peter McIlvenna

The “red-green convergence” links Marxist/leftist ideologies (“red”) with Islamic supremacism (“green”) in a shared campaign against Western capitalism, Biblical values, and national sovereignty.

This alliance exploits Hijrah—the traditional Islamic concept of migration to spread and strengthen the faith—while leveraging free speech to demand submission and resist assimilation.

Joint activism, anti-Western protests, and policy advocacy demonstrate how America’s welcoming immigrant heritage is being used to thwart genuine integration, potentially leading to enclaves where veiling, gender inequality, and alternative norms prevail.

“You often hear about the red-green axis. That’s how Marxism has connected with Islam. And they’re working together to destroy Western civilization (along with the globalist blue and the yellow, cowards and traitors). And we’re seeing it happen around the world, including in the United States.” —Kevin Freeman

The American advantage remains. We can still learn from Europe’s mistakes. When constitutional authority stays supreme, integration is enforced, and Biblical confidence is actively renewed, pluralism thrives without fragmentation.

But if hesitation sets in—allowing parallel structures to normalize—early institutional trends can quickly harden into the kind of divisions now visible across the Atlantic.

⚠ Attention: The stealthy buildup of Islamic institutions in the US, accelerated by red-green alliances and demographic momentum, represents an existential internal threat to American liberties and sovereignty—unless we act decisively now to preserve uniform constitutional order and the Biblical foundation that has sustained our freedom and prosperity.
