

The Four Horseman of the American Apocalypse **The Blue Horse: Globalism & Deep State**

In today's rapidly shifting geopolitical environment, globalism (the *Blue Horse*) has emerged as a coordinated ideological and institutional project that seeks to weaken national borders and individual liberties in favor of centralized international control through organizations such as the United Nations (UN), the World Health Organization (WHO), and the World Economic Forum (WEF), while using financial systems and strategic alignments with hostile or

authoritarian regimes to reshape how power is exercised, how wealth is distributed, and how societies define sovereignty, identity, and freedom—posing a direct challenge to America's constitutional self-governance, economic independence, family stability, and personal liberty.

In this briefing we will discuss the following:

- » The Blue Horse: Globalism as an Institutional Ideology — and how it emerged
- » Globalism's Alignment with Communist China and Islamist Regimes to Shift Global Power
- » Economic and Demographic Engineering as Tools of Global Control & How to Fight Back

YOUR MISSION: Learn how globalist ideology reshapes politics, the economy, and culture so you can help protect national sovereignty, economic independence, and individual liberty.

WHY YOU SHOULD CARE

- » This agenda determines whether your country remains self-governing or is managed by global institutions. It directly shapes whose priorities drive national policy.
- » Globalism increasingly affects everyday life through money, education, regulation, and culture. It influences your job opportunities, family life, and community stability.

- » Understanding these systems helps you anticipate policy, financial, and cultural shifts. It allows you to protect your household and long-term plans before disruptions occur.
- » Global power shifts affect your job, local industries, and economic security. Dependence on adversarial regimes raises costs and weakens domestic resilience.
- » Economic and demographic tools shape culture, borders, and personal freedom. Recognizing them helps protect your family, values, and long-term security.

1. The Blue Horse: Globalism as an Institutional Ideology — and how it emerged

From our vantage point, globalism is not simply a trend in diplomacy or international cooperation. It is an ideology that openly rejects the nation-state as the primary organizing unit of political life and replaces it with centralized global governance over politics, economics, and even culture and religion.

The purpose is not coordination among sovereign nations, but the gradual transfer of authority away from constitutional governments and into permanent international institutions.

“Globalism very simply is an ideology that believes we should eliminate nations and the nation-state as the principal organizing unit of geopolitics and move toward an increasingly global system of government.” —Alex Newman

Under this model, international organizations serve as operational hubs for implementing policy across borders.

These institutions increasingly shape health rules, financial regulations, education standards, environmental mandates, and speech and information frameworks.

What appears publicly as cooperation is, in reality, the construction of parallel governing structures that operate beyond the reach of voters and national legislatures.

The architecture of this system did not emerge by accident. Its foundations were laid during the early twentieth century and became firmly established with the creation of the United Nations in 1945.

One of the central figures in that process was Alger Hiss, a senior U.S. State Department official who chaired the conference that drafted the UN Charter and later served as its first secretary-general—before being exposed as a Soviet agent.

The institutional DNA of global governance was shaped at its birth by individuals whose loyalties were not aligned with American sovereignty.

“[Alger Hiss] was a Russian spy, Soviet spy in the United States, serving in our government and leading us into this United Nations that has spawned out of it, the World Health Organization. The World Economic Forum is not directly tied, but it has a similar philosophy.” –Kevin Freeman

From that foundation, the system expanded rapidly through a growing web of international bodies and public-private partnerships. Over time, major private financiers and political networks became critical to scaling and protecting this structure.

Funding streams, media influence, education initiatives, and activist movements have been used to normalize global governance and marginalize national authority. This financing infrastructure has allowed globalism to move far beyond diplomacy and into culture, corporate policy, civil society, and public opinion.

Organizations such as the World Economic Forum now operate as convening platforms where political leaders, multinational corporations, financial institutions, and regulators align policy priorities outside of democratic accountability.

Concepts such as “stakeholder capitalism” and global regulatory coordination advance decision-making structures that increasingly bypass national voters and legislatures altogether.

The real significance of this institutional design is the quiet relocation of governing power. Authority shifts from elected representatives and constitutional systems to permanent international bodies and networks that cannot be removed by the public.

The objective is not simply international influence—it is the structural re-engineering of how power and control are exercised.

As this governance architecture consolidates, it becomes the platform through which far more consequential partnerships can be advanced to control the people.

The same institutions that now shape regulatory policy also provide the infrastructure for aligning with authoritarian regimes and hostile powers—an alignment that accelerates the erosion of national independence and prepares the ground for a new global power order.

Attention: Globalism is a deliberate institutional system designed to replace national self-government with centralized global authority—reshaping political, economic, and cultural life and laying the foundation for the power realignments explored in the next section.

2. Globalism's alignment with Communist China and Islamist regimes to shift global power

The Blue Horse does not operate in isolation. The same global governance architecture built through international institutions now serves as the platform for strategic alignment with authoritarian and hostile regimes—most notably Communist China and Sharia-adherent Islamist governments.

From our perspective, these partnerships are not incidental. They are deliberate instruments for reshaping the global balance of power and accelerating the decline of American leadership.

Communist China did not rise simply through organic economic development. It was deliberately elevated through diplomatic, financial, and industrial policies supported by Western political and financial elites.

During and immediately after World War II, pro-American Chinese nationalist leadership under Chiang Kai-shek was weakened through U.S. arms embargoes and diplomatic decisions, while Mao Zedong's communist forces—supplied by the Soviet Union—were allowed to consolidate power.

Over the decades that followed, globalist networks actively invested in China's industrial base, trade integration, and political legitimacy. Influential Western figures praised China's governing model and promoted its integration into the global economic system.

The result is a regime that now possesses massive manufacturing dominance, financial leverage, and growing control inside the very international institutions created to manage global policy.

China's role is not simply economic. It functions as a demonstration model for the future of global governance itself.

"Communist China came to prominence as a direct result of the subversive efforts of the deep state... They created Communist China... They're building up Communist China for a reason... because they see it as a template, as a pilot program, a model for the kind of system they're seeking at the international level." —Alex Newman

From the standpoint of global governance planners, China demonstrates how large populations can be governed through surveillance, centralized administration, limited civil liberties, and total coordination between the state and the economy. It provides a working prototype for managing societies at scale.

At the same time, the same pattern appears repeatedly in the Middle East and Latin America.

Western-aligned leaders have been displaced and replaced by hostile or Islamist regimes through diplomatic pressure, political manipulation, and international support structures.

Iran's 1979 revolution and Cuba's earlier communist takeover followed a familiar script—pro-Western governments weakened, anti-Western movements empowered, and hostile regimes installed.

These Islamist regimes and movements play a different but complementary role. They destabilize social cohesion, undermine Christian cultural foundations, and intensify political fragmentation inside Western societies.

“I think the globalists think the communists are useful to their agenda. They think the Islamists are useful to their agenda.” –Alex Newman

The strategic value of this alignment lies in its dual pressure. China supplies industrial scale, economic leverage, technological infrastructure, and administrative capacity. Islamist movements contribute social disruption, ideological conflict, and cultural destabilization within Western nations. Together, they weaken domestic resilience while strengthening external influence over global institutions.

Today, this alignment is visible in the growing influence of China and its allies inside United Nations agencies and international regulatory bodies—despite the United States continuing to fund a large share of those institutions.

This structural imbalance enables Beijing and other aligned regimes to shape global health rules, trade frameworks, development policy, and security norms in ways that directly disadvantage American sovereignty.

The cumulative effect is the accelerated transition away from a U.S.-led world toward a multipolar order in which regional power blocs are coordinated by centralized international institutions—rather than governed by independent nation-states.

Attention: Globalism strategically aligns with Communist China and Islamist regimes to shift global power away from the United States and toward a centralized, multipolar system built on authoritarian models and hostile influence.

3. Economic and Demographic Engineering as Tools of Global Control & How to Fight Back

Once the global governance architecture is in place—and once strategic alignment with authoritarian regimes is secured—the next phase is implementation. That implementation occurs through economic and demographic engineering.

These tools are not isolated policy failures. They form a coordinated control system designed to reshape societies, weaken nations, and consolidate authority at the global level.

The most visible expression of this system is what we describe as the “six trials by fire”: escalating national debt, attacks on the dollar and national currencies, centralized digital money systems, widening wealth gaps, demographic decline, and mass migration. Together, these pressures destabilize economic independence and social cohesion at the same time.

Economically, the system depends on permanent debt expansion and monetary manipulation. The abandonment of gold-backed currency removed the structural limits on money creation, allowing governments and financial institutions to fund massive domestic and international programs without direct public consent.

That same monetary architecture enabled the long-term offshoring of American industrial capacity—especially to Communist China—while hollowing out domestic manufacturing and middle-class stability.

“CBDC is entirely a globalist project meant to accelerate the shift of political and economic power from nation-states to global institutions.” —Alex Newman

Central Bank Digital Currencies (CBDC) represent the next stage of this monetary system. Unlike cash or traditional banking, programmable digital currency allows transactions to be monitored, restricted, and conditioned in real time.

This creates unprecedented institutional leverage over personal economic behavior and removes the remaining barriers between financial policy and direct social control.

At the same time, demographic policy operates in parallel. Global institutions promote population reduction, delayed family formation, and child-free cultural norms through education, health policy, and international development programs.

As birth rates fall and labor shortages emerge, mass migration is presented as the solution—while simultaneously weakening national identity, cultural cohesion, and religious heritage.

“The mass migration that we’ve seen... across the Western world... is entirely a globalist project, and it always has been... the whole concept of being a nation starts disintegrating.” –Alex Newman

These economic and demographic mechanisms reinforce one another. Monetary systems destabilize middle-class wealth and concentrate financial power upward. Cultural and demographic policy reshapes social structures and lowers resistance to centralized authority.

Immigration policy accelerates fragmentation and makes shared civic identity increasingly difficult to sustain.

The combined effect is not merely economic hardship or social change. It produces a population that is more economically dependent, more culturally divided, and far easier to manage administratively at scale.

As this control infrastructure matures, economic behavior, family formation, mobility, and even personal choices become progressively integrated into regulatory and financial systems governed beyond national borders.

Attention: Economic and demographic policy is being used as a coordinated control system to weaken national independence, fragment society, and concentrate political and financial authority at the global level.

2. Look into using [Classical Conversations](#) as an educational resource.
3. Visit [TransactionalGold.com](#) to learn more about the gold and silver solution to CBDC and what is happening in your state.
4. Learn how global institutions and financial systems actually work — especially the UN, WHO, and emerging central bank digital currencies — so you can recognize risks to national and personal freedom.
5. Strengthen your personal and family financial resilience by reducing exposure to inflation, debt-driven systems, and potential financial surveillance.
6. Protect children and communities from ideological capture by supporting education and civic efforts that reinforce constitutional literacy, national history, and moral formation.
7. Engage locally where real influence exists — school boards, parent groups, and community organizations — to defend family formation, cultural stability, and self-governance.
8. Support policies and initiatives that restore domestic strength — especially secure borders, supply-chain reshoring, and American manufacturing and energy independence.

ONGOING ACTION STEPS:

1. Visit [TransactionalGold.com](#) to learn more about the gold and silver alternative and what is happening in your state.
2. Get the book [Pirate Money](#) to learn about the transactional gold and silver movement sweeping America. Legislation has now passed in Florida, Texas, Arkansas, Louisiana, and Missouri! This is the answer to inflation and the looming threat of CBDC.
3. Get a copy of [According to Plan](#) to better understand these domestic attacks on our Liberty as well as the overall Marxist plan to consume America.

4. Seek opportunities to inspire other Americans to stand up for what is right.
5. Send them this Economic Battle Plan™ and ask them what they are doing to stand for America and Liberty!
 - » Elect Politicians that understand the need to preserve American Liberty.
 - » Encourage and ask your elected officials to educate themselves.
 - » Ask them how they are working to strengthen our education system and reverse the push for Marxist indoctrination. These are big issues, if your representatives are not aware and working toward solutions directly or indirectly based on their committees, hold them accountable!
