

The Four Horsemen: Preparing Your Family

America is facing a convergence of economic, geopolitical, and cultural pressures that are no longer theoretical. Federal debt has surged to historic levels, the dollar's global dominance is being questioned, digital currency systems are advancing, and social cohesion appears strained. At the same time, coordinated adversarial forces are exploiting vulnerabilities in our economic system, cultural fabric, and national security—testing the resilience of both our institutions and our families.

These realities demand more than passive awareness; they require practical preparation. Families are asking urgent questions: How do we protect our savings? How do we align our money with our values? How do we prepare if instability accelerates? This Economic Battle Plan™ examines the structural risks facing the nation and outlines actionable steps individuals can take to safeguard their financial security, strengthen their households, and contribute to long-term American resilience.

In this briefing we will discuss the following:

- » The Four Horsemen: Coordinated Adversarial Forces & Their Trials by Fire
- » Monetary Risk, Financial Independence & “Pirate Money” as a Defensive Strategy
- » Personal Action: Economic Alignment, Civic Engagement & Family Preparedness

YOUR MISSION: Equip yourself with a clear understanding of the structural risks facing the American economic system and implement practical, values-aligned strategies that protect your family’s financial security, personal freedom, and long-term resilience — while contributing to the preservation of American sovereignty and liberty.

WHY YOU SHOULD CARE

- » Coordinated adversarial pressures and internal policy failures can compound, turning debt, currency instability, and cultural division into broader national vulnerability, directly impacting you and your family.
- » Federal debt and potential dollar weakening directly affect interest rates, food costs, housing prices, and overall household purchasing power.
- » The expansion of digital currency systems such as CBDC could reshape financial privacy and control over personal transactions.
- » Gold and silver, recognized constitutionally as legal tender at the state level, offer a potential hedge against inflation and monetary instability.
- » Aligning your spending, investing, civic engagement, and preparedness with your values strengthens your family's resilience while reinforcing long-term national stability.

1. The Four Horsemen: Coordinated Adversarial Forces & Their Trials by Fire

America's current vulnerabilities are not isolated problems — they are interconnected pressures being exploited by coordinated adversarial forces.

ECONOMIC BATTLE PLAN™

PREPARING YOUR FAMILY **10.386**

CLEARED FOR RELEASE 03/05/2026

[Economic Battle Plan™ points: 100]

We describe them as the Four Horsemen:

- » **Red: Communist China** — state-aligned economic warfare leveraging manufacturing dominance, supply chain control, and U.S. Treasury holdings to influence global finance.
- » **Green: Sharia-based political Islam**— advancing influence through migration strategies such as *hijra* (the organized relocation of adherents to establish ideological strongholds).
- » **Blue: Globalist economic centralization movements** — promoting supranational governance structures and financialization, where wealth is increasingly generated through monetary engineering rather than productive industry.
- » **Yellow: Internal enablers** — policymakers, institutions, or elites who prioritize profit or power over national interest, allowing the first three forces to advance.

“These are allied forces, an axis of evil of sorts that wants to abuse our national liberty experiment and see it fail so they can dominate the world.” – Kevin Freeman

These adversarial pressures interact with what we call the Six Trials by Fire — structural crises that compound one another:

1. Federal debt expansion
2. Currency vulnerability
3. Central Bank Digital Currency (CBDC)
4. Widening wealth gap
5. Demographic decline
6. Mass immigration threatening national security

Federal debt is the first accelerant. As debt approaches \$40 trillion — exceeding U.S. GDP — confidence in the dollar weakens. -->

Currency instability increases inflation risk. -->

Inflation erodes purchasing power and widens wealth gaps. -->

Economic anxiety discourages family formation and long-term planning. -->

Demographic weakness reduces economic vitality and national defense capacity.-->

Low birth rates demand mass immigration that too often it is exploited by enemies.

It is a nasty death spiral that could very well mean the end of the great American experiment if we do not correct course immediately!

“When a currency fails, it starts a vicious cycle ending in dramatic hyperinflation... in the same way, each of the Six Trials by Fire builds on the other. If we fail to address them, our nation as we know it is gone.” –Kevin Freeman

This is not merely political rhetoric; it is structural analysis.

- » Debt growth greater than economic output creates systemic vulnerability.
- » Foreign governments reducing dollar exposure pressure bond markets.
- » Inflation amplifies social fracture.
- » Policy instability accelerates capital flight.

Each trial intensifies the next.

The roots of this cascade trace back to 1971, when the final link between the dollar and gold was severed. That decision, combined with trade and petrodollar arrangements, reshaped global monetary flows.

Those frameworks, now under strain, have contributed to renewed currency competition and geopolitical tension.

The warning is clear: when fiscal discipline erodes and monetary confidence weakens, adversaries gain leverage. Economic fragility becomes strategic vulnerability.

Attention: When debt, currency risk, and geopolitical pressure converge, national stability shifts from theoretical concern to structural reality — making monetary resilience the next critical line of defense.

2. Monetary Risk, Financial Independence & “Pirate Money” as a Defensive Strategy

If structural instability begins with debt and currency vulnerability, then monetary resilience becomes the obvious next line of defense.

Federal debt has expanded beyond historic norms, and foreign governments have increasingly signaled interest in reducing dependence on the U.S. dollar.

When reserve holders trim Treasury exposure and global trade arrangements shift, the risk is not abstract — it manifests in higher interest rates, increased borrowing costs, elevated import prices, and pressure on household budgets.

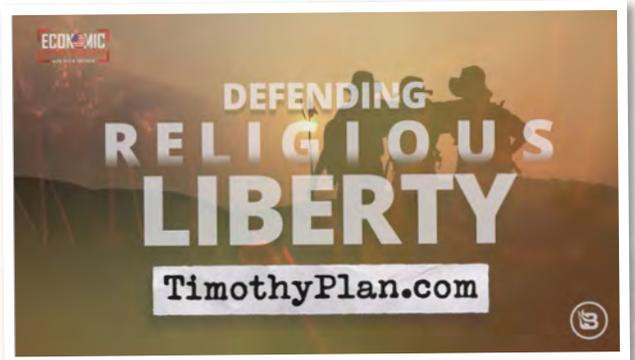

Currency instability weakens purchasing power and amplifies economic anxiety.

Prolonged fiscal imbalance has historically preceded severe inflation. In extreme cases, it has resulted in hyperinflation — rapid currency devaluation that destroys savings and destabilizes economies.

While such outcomes are not inevitable, structural vulnerability increases exposure.

At the same time, proposals for a Central Bank Digital Currency (CBDC) introduce a new dynamic.

A CBDC is a government-issued digital currency that could be programmable — meaning transactions would be monitored, restricted, or conditioned. Supporters use the excuse that this improves efficiency and reduces fraud. They offer CBDC as a solution to a dollar at risk. Critics see what it really is: a tool for unprecedented central oversight of economic activity, simply put, total control.

“The way to beat these trials by fire is Pirate Money.” –Kevin Freeman

The Pirate Money strategy is rooted in constitutional authority and technological modernization. Article I, Section 10 of the U.S. Constitution permits states to recognize gold and silver as legal tender. Several states have begun implementing legal frameworks that support transactional use of these precious metals.

The strategy centers on:

- » State-recognized gold and silver legal tender
- » Removal of capital gains taxation on precious metals to enable everyday use
- » Integration with modern debit-style payment systems that function alongside existing networks

“Imagine having your own personal gold and silver standard, where you could be paid in gold or silver and spend gold and silver with a debit card.” –Kevin Freeman

Gold and silver historically serve as monetary hedges because they are scarce, tangible, and cannot be issued by political decree. Unlike fiat currency, they cannot be expanded through monetary policy.

As inflation pressures have increased, gold’s price appreciation has reflected renewed demand for stability and diversification.

Pirate Money is not a rejection of the dollar — it is a reduction of concentrated exposure. It blends constitutional principles with modern payment infrastructure to provide an alternative rail within the existing system.

Once monetary exposure is diversified, the logical next question becomes broader alignment: How should individuals deploy their spending, investing, and civic engagement to reinforce long-term stability?

⚠ Attention: Monetary diversification is the foundation of resilience — but financial strength must be paired with disciplined economic alignment to fully protect family and nation.

3. Personal Action: Economic Alignment, Civic Engagement & Family Preparedness

Monetary resilience is only the foundation. What ultimately determines long-term national strength is how individuals deploy their economic power and civic influence.

Economic participation is not passive.

Every dollar directed through **giving, spending, and investing** shapes the marketplace and, by extension, the culture. Capital allocation influences corporate governance, public policy pressure, and even geopolitical outcomes.

Many Americans unknowingly fund initiatives that conflict with their values through retirement accounts, index funds, or everyday purchases.

Personal action begins with alignment.

- » **Giving** — Vet charities and ministries carefully. Ensure financial support reinforces pro-family principles, constitutional governance, and national sovereignty rather than open-border or anti-faith agendas.
- » **Spending** — Prioritize American-made goods and allied production when possible. Evaluate telecom providers, banks, and corporations to determine whether they support policies consistent with liberty and national security.
- » **Investing** — Review asset managers and funds. Large firms such as BlackRock have promoted DEI (Diversity, Equity, Inclusion frameworks prioritizing social mandates) and ESG (Environmental, Social, Governance scoring systems aligned with globalist policy agendas). Investors should assess whether their portfolios reflect their convictions and consider alternatives that screen for conservative, values-based criteria.

This is precisely why we launched the **National Security Investment Consultant Institute (NSIC)**.

“Align all three things that you can do with your money: giving, spending, and investing, with the goals of liberty, security, and values from an American perspective.” –Kevin Freeman

ECONOMIC BATTLE PLAN™

PREPARING YOUR FAMILY **10.386**

CLEARED FOR RELEASE 03/05/2026

[Economic Battle Plan™ points: 100]

Imagine 10,000 vetted, values-aligned financial advisors stewarding trillions of dollars with liberty, security, and constitutional principles at the center of every allocation decision. Visit nsic.org to connect with an advisor today.

That is not just portfolio management — that is strategic economic influence. If you have a financial advisor, encourage them to explore NSIC. If you are an advisor, this is your call to step forward. Capital, properly aligned, becomes a force multiplier. When money aligns with conviction, economic power becomes a stabilizing force rather than an accelerant of decline.

“This is your part to play and how you can make a difference in saving America and protecting your family.” –Kevin Freeman

But civic responsibility is only one component. The strategy extends into seven deliberate action steps designed to protect families while strengthening the nation.

1: Support SCAN (Saving Civilization Action Network)

Threat awareness must be continuous. [SCAN](#) is designed to monitor red, green, blue, and yellow threats in real time at both local and national levels. It exists to ensure families are informed without relying solely on filtered or biased narratives. **Preparedness begins with awareness.**

2: Join the Pirate Money Movement

Monetary resilience requires diversification. Supporting state-recognized gold and silver transactional systems reduces concentrated exposure to fiat currency risk and centralized control. This step builds financial optionality and autonomy into your household strategy.

3: Align Your Giving, Spending & Investing

Economic participation is not neutral. Where you give, what you buy, and how you invest either reinforces liberty or funds forces working against it. Capital aligned with conviction becomes a stabilizing force rather than an accelerant of decline.

4: Develop a Personal & Family Disaster Plan

Preparedness reduces vulnerability. Families should determine what to stockpile, how to communicate if systems fail, and how to protect property and loved ones during unrest or emergency conditions. Prepared families respond with clarity instead of panic. ([Episode 106](#) has some great information for building your family action plan.)

5: Weaponize Your Vote

Vetting candidates is not optional. Citizens must ask hard questions about constitutional integrity, foreign influence, border security, and ideological encroachment. Ballot initiatives matter as much as candidates. Strategic voting reinforces structural stability.

6: Revitalize Patriotism & Educate the Next Generation

Cultural renewal determines generational resilience. Teaching American history, constitutional principles, and national identity ensures continuity beyond immediate political cycles. National identity is inherited — or it is lost.

7: Strengthen Spiritual Foundations

Structural resilience without moral grounding is incomplete. Personal repentance, faith, and spiritual discipline anchor courage and steadiness during uncertain times. For America to heal, it must turn back to God, and for such a great awakening to take place in our nation, it must first take place in our hearts.

Economic alignment. Civic vigilance. Family preparedness. Cultural renewal. Spiritual grounding. Integrated together, these seven steps form a layered defense strategy.

Attention: Disciplined citizens who act intentionally — economically, civically, and spiritually — become the stabilizing force that preserves liberty and strengthens the nation.
